

Paradigm of Lambda Networking

- <2000: Big Sciences: Flows 10s of Gbit/s flows
- 2000: TNC discussions (Antalya, TR)
- 2001: 1st LambdaGrid Workshop
- 2002: Start of NetherLight
- 2003: GLIF & Tech WG
- 2005: Start winter Tech WG meetings
- 2008: Merge Ctrl & Tech → Tech
- Feb 2011: The 17th GLIF meeting (and my 17th)

GLIF is Special

- From day 1 until now:
 - Collaboration
 - Equalness
 - Trust
 - Clear and simple vision: Linking the World with Light, E2E
- And look what we have accomplished:
 - A truly Global Facility for Lambda networking
 - Eye-catching Industry's First Demos
- Much thrilling work ahead of us:
 - On Integration, automation
 - On Reach

Technical stuff, moving forward

- Things that are looming:
 - Multi-domain dyn LP provisioning through NSI
 - 40G intercontinental lightpath end-user
 - 100G continental lightpath end-user
 - New Ethernet technologies NGE, CE
- Things over the horizon:
 - Terabit lambdas
 - 100G intercontinental

Going forward

- Will miss this Community and many good friends dearly
- Trust that with Lars and Gigi GLIF Tech is in very capable hands
- Now for me: Onwards!
- But let's stay in touch...

Thank You All...

...for 10 wonderful years of high-end global
ground-breaking data networking pioneering
