Dear Colleague,

You are kindly invited to attend the presentation of the Mantychore FP7 project results within the context of the TNC2012 conference, 21 - 24 May, Reykjavík, Iceland.

The Mantychore FP7 is devoted to offer **IP** Network as a Service capabilities to NRENs. To do so, the project is currently producing a tool to automate the generation of IP resources through an open Network as a Service framework called **OpenNaaS,** a toolset that allows network virtualization services to be deployed**.**

The workshop "**OpenNaaS, a toolkit for IP Networks as a Service**" will show the project and a service prototype demo of the **OpenNaaS** toolset, followed by a round table with key industrial partners.
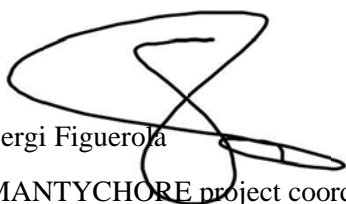

The workshop aims at promoting active engagement with potential **OpenNaaS** users. **OpenNaaS** can be a tool that may benefit your developments, so we are very interested on establishing a relation with you towards offering new services to the NREN community. The intended audience is both NRENs and commercial operators with and emphasize on network research and innovation towards Cloud and IaaS offerings.

Thus, your participation at his stage of development is very valuable: we want to know your opinion and take into consideration your service and business needs, with an emphasis on practical implementations.

If you have any topic or question that you would like to raise or have us investigated before the Workshop event, please email: andrew.mackarel@heanet.ie.

Please do feel free to forward this email to any colleagues who will be travelling to TNC and may be interested in attending our Workshop.

Sincerely,

Sergi Figuerola
MANTYCHORE project coordinator

Workshop Details

Place: Háskólabíó - University Cinema, Reykjavik, Iceland.

Date: Sunday May 20th prior to the TNC2012 Conference
Time: from 14:00 to 17:00

The event is free of charge but registration is required. Please visit:
https://www.terena.org/events/details.php?event_id=2241

Workshop Agenda

13:30 Tea/ Coffee and registration

14:00 Welcome and Introduction to workshop (*Sergi Figuerola*)

14:10 Use cases of Mantychore (*Dave Wilson)*
14:30 Overview of Project Technology Implementation **OpenNaaS** (*Pau Minoves)*
15:00 Demonstration of a logical IP Network with BoD *(P. Minoves and D. Wilson)*

15:30 Coffee Break 15 min

15:50 Global communication industry and service providers leverage Mantychore to develop new business models.

     Diego R. Lopez (Telefonica I+D)

     Klaus Grobe (ADVA)

     CISCO (TBC)

16:20 Panel Session Round Table (Q&A) *Chaired by Lars Fischer*

17:00 Closing remarks
