Enlighten Your Research

A contest for scientists using lightpaths

Erik-Jan Bos – SURFnet

Praha, CZ – September 2007

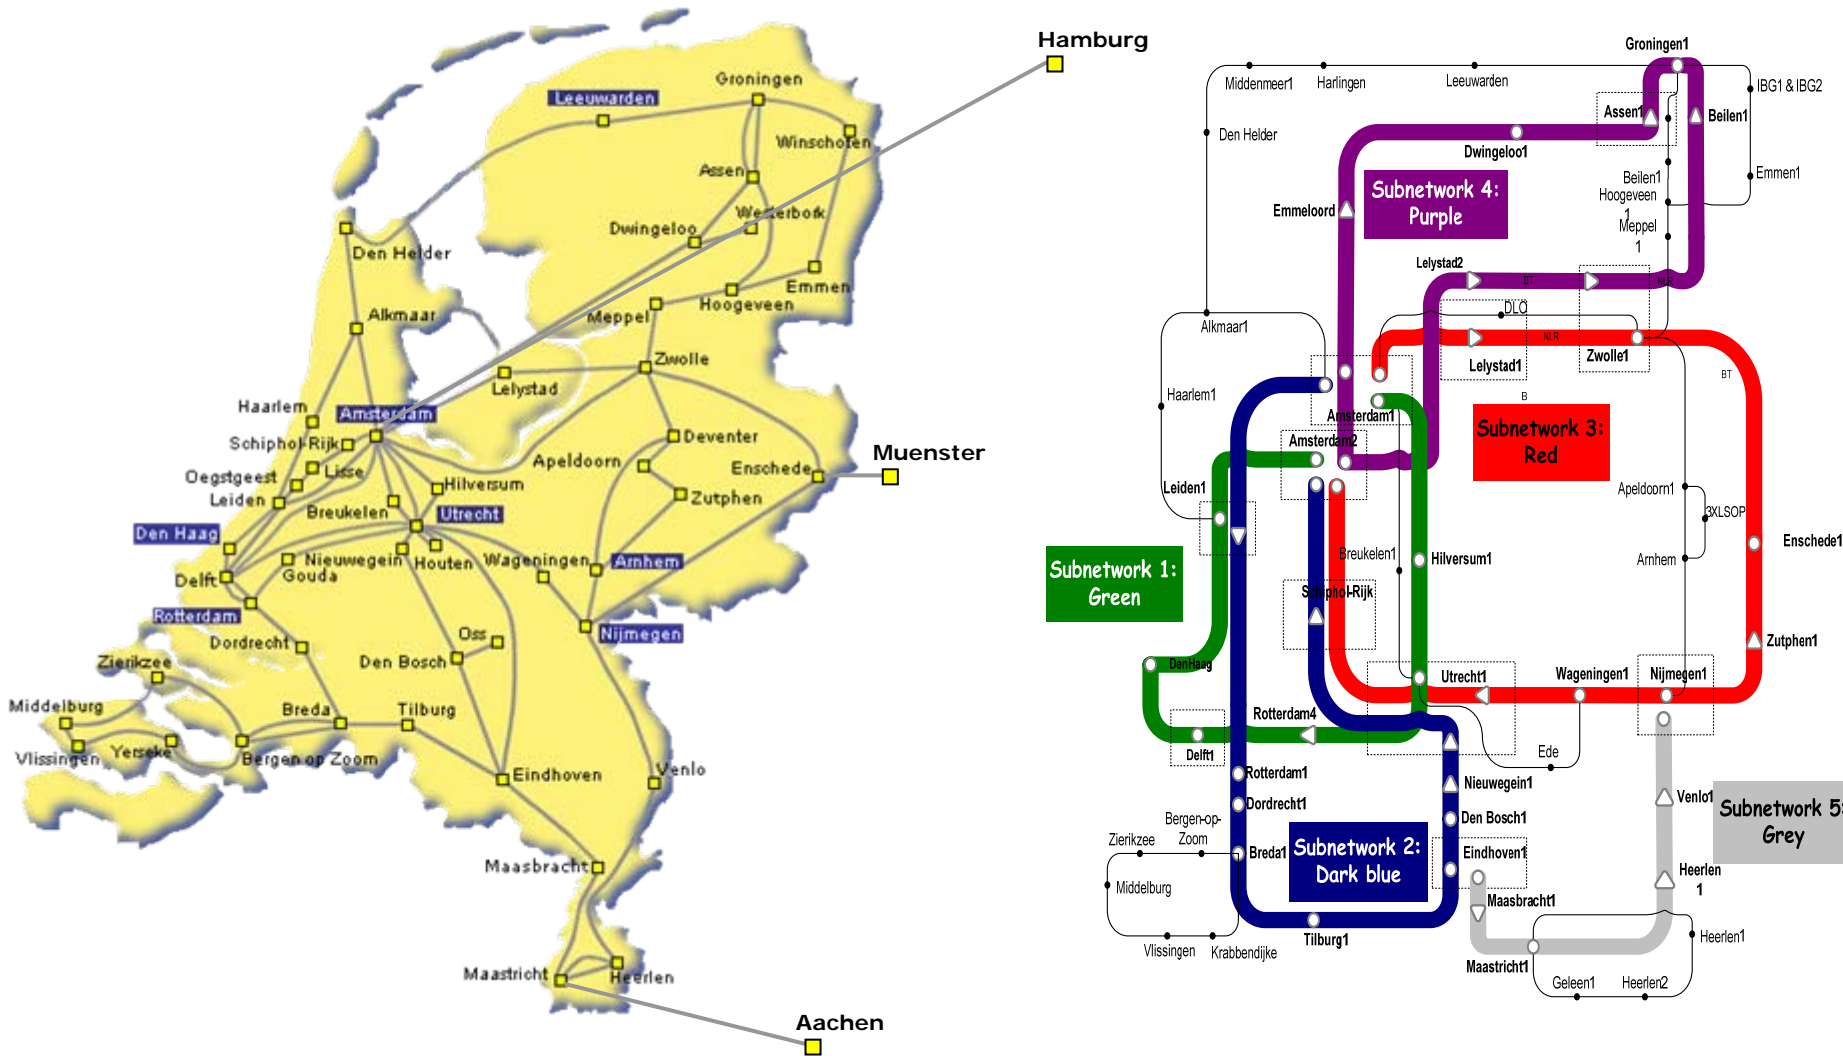

NREN Challenge

- How to accommodate needs of big and demanding scientific users for higher speed, higher quality networking, e.g.:
 - Astronomy: eVLBI and LOFAR
 - Particle Physics: Large Hadron Collider
 - Medical imaging & research
 - Media streaming, such as HDTV and 4K
- While protecting the performance of the network for current users
- In an economically sound way
- And keeping the successful end-to-end model of the internet

SURFnet6 DWDM on dark fiber

Lightpaths on SURFnet6

- 2005: photonic layer of SURFnet6 becomes operational
- Lightpaths become available to first users:
 - Astronomers and particle physicists
 - First 10G lightpath for LOFAR storage between Groningen and Amsterdam
 - ICT departments connecting remote locations using OPNs
- Lightpaths can and will create new possibilities to scientists by enabling efficient online collaboration

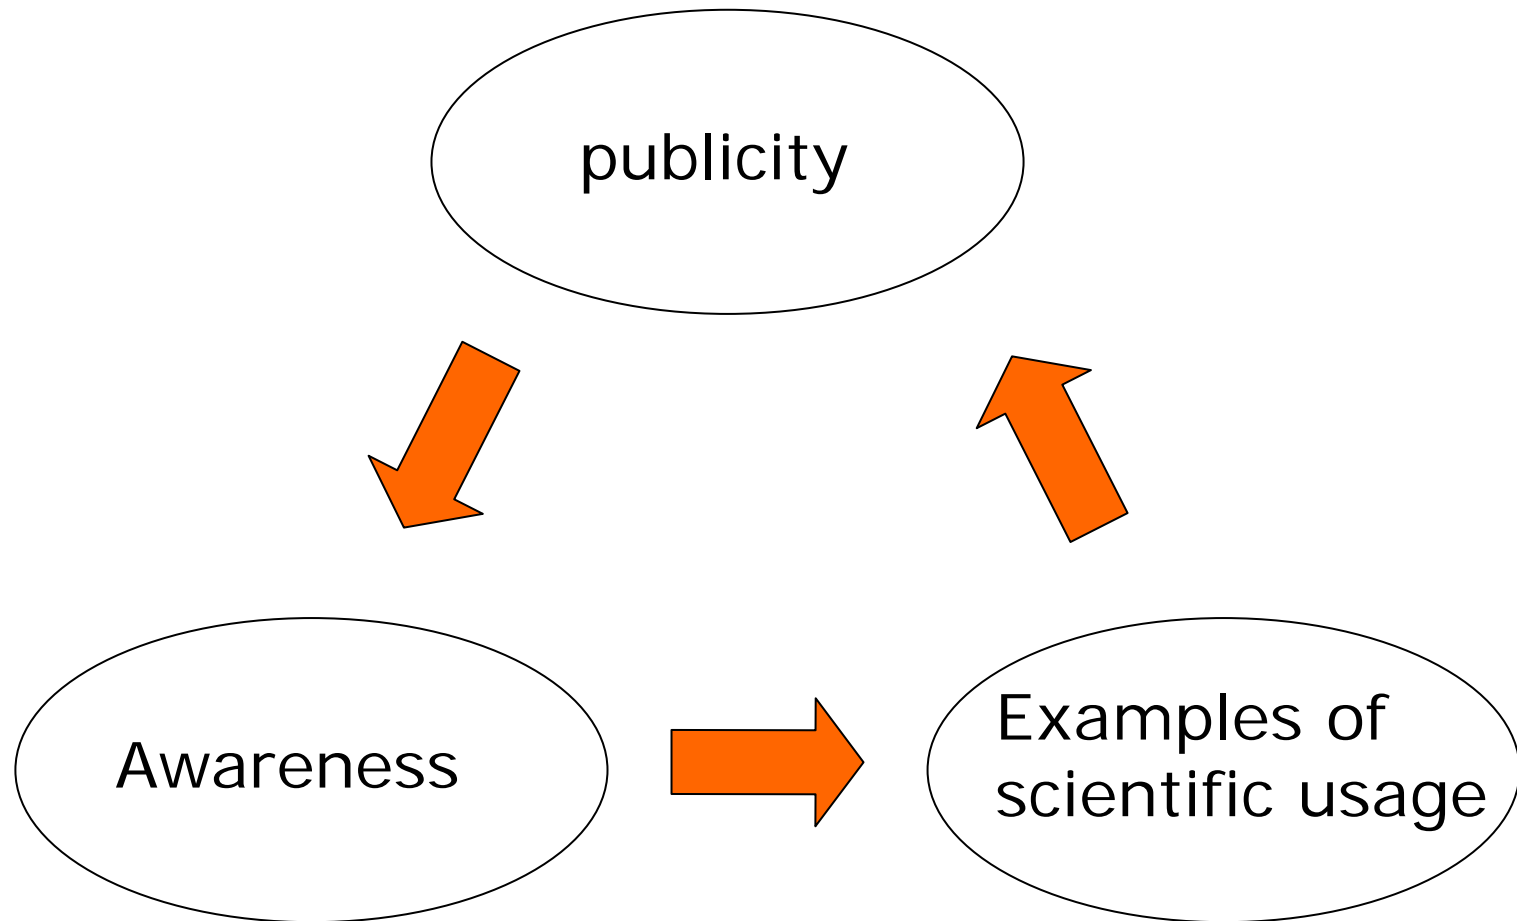

Where are scientific users?

- Most scientist were unaware of the existence of lighthpaths and the possibilities they offer
- Examples of lightpath usage are needed to further stimulate creativity among scientist
- How do you reach scientists?

Stimulate scientific use

A contest

- A contest appeals to scientists as it parallels with research grants
- SURFnet has experience with contests

Build a website

Create a movie

Cooperation with NWO

Nederlandse Organisatie voor Wetenschappelijk Onderzoek

- NWO is the Dutch National Science Foundation (and has a chair in SURFfoundation)
- Announcement of the contest to science community by NWO
- Contribution to the jury

The contest

- Two stages:
 1. draft proposals, selection process -> shortlist
 2. final proposals
- Terms and conditions
- Criteria
- Formation of a jury

Criteria and judging process

Awarding the prizes

- 18 high-quality complete proposals received for the final stage
- Five main prizes, each:
 - Lightpath(s)
 - Grant (20 kEUR) to include lightpath in research
- Awarding ceremony with all contesters present
- Press release and radio interview

Enlighten Your Research: Winners

- The 5 winners are:
 - Distribution of radiology images in the NELSON lung cancer screening study – UMCG & UMCU
 - High-throughput genome-wide analyses in Amyotrophic Lateral Sclerosis (ALS) – UMCU & UCLA
 - Intelligent CCTV monitoring at Arke Stadium –TI e.a.
 - Electron microscopy using lightpaths – LUMC, TUE & SARA
 - Remote High-Resolution Visualisation of Climate Data using Pixel Streaming – UU & SARA
