

MAN LAN Update

Christian Todorov
October 1, 2008

Recent Events

- Upgraded the HDXc to 5.0 code
- Connected Ankabut (UAE)
- Implemented an initial perfSONAR capability for circuit monitoring

Future Plans

- GEANT will remove their NYC router and connect their OC192 through to a 10GE on the MAN LAN switch; IP peerings will occur on their router in Amsterdam
- Add a dynamic or user controlled capability
- Investigate a technology refresh to address going demands and capabilities
- Fully enable perfSONAR for monitoring dynamic circuits established through MAN LAN
