# **CANARIE UPDATE and Next Generation GOLE**

GLIF Meeting  
Geneva, Switzerland  
- from Ottawa Canada -  
October 14, 2010

Eric Bernier, CANARIE  
[Eric.Bernier@canarie.ca](mailto:Eric.Bernier@canarie.ca)

# Agenda

- Extension to CANARIE Services
- CANARIE Network Infrastructure
- 100G Demonstration
- New GOLE Equipment (Seattle and Chicago)

# Extension to the CANARIE Services

canarie

- Current Network Services:
  - R&E IP Networking, IPv4, IPv6 Unicast and multicast
  - Lightpath Service. (Manually configured)
- Services being extended:
  - IPv6: Offering transit over the CANARIE Network
  - Settlement Free Peering – Planning Phase
    - Peers with content providers directly and through Internet Exchange Points,
    - Content providers, such as Google, Amazon.
  - Fibre Footprint: Planning to extend the CANARIE ROADM footprint beyond the Eastern and Western ROADM

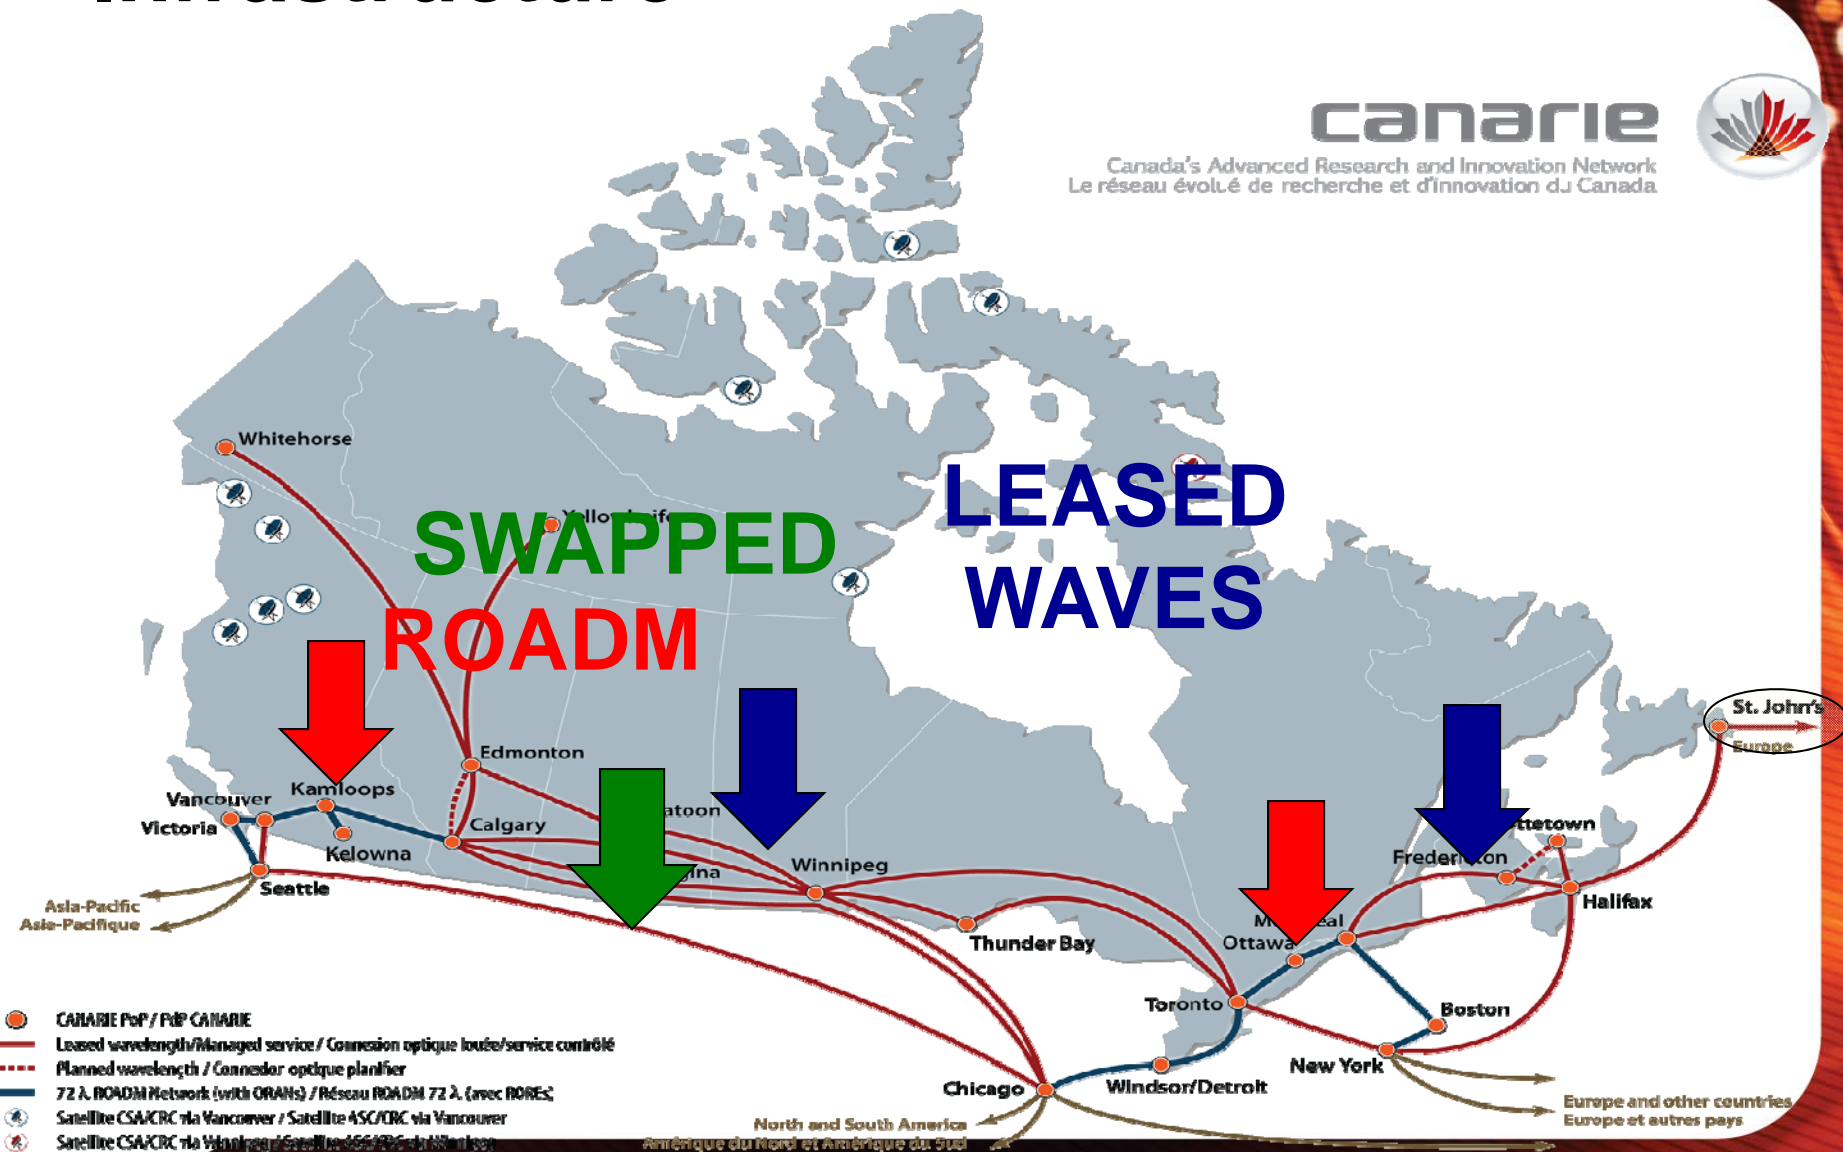

# CANARIE Network Infrastructure

canarie

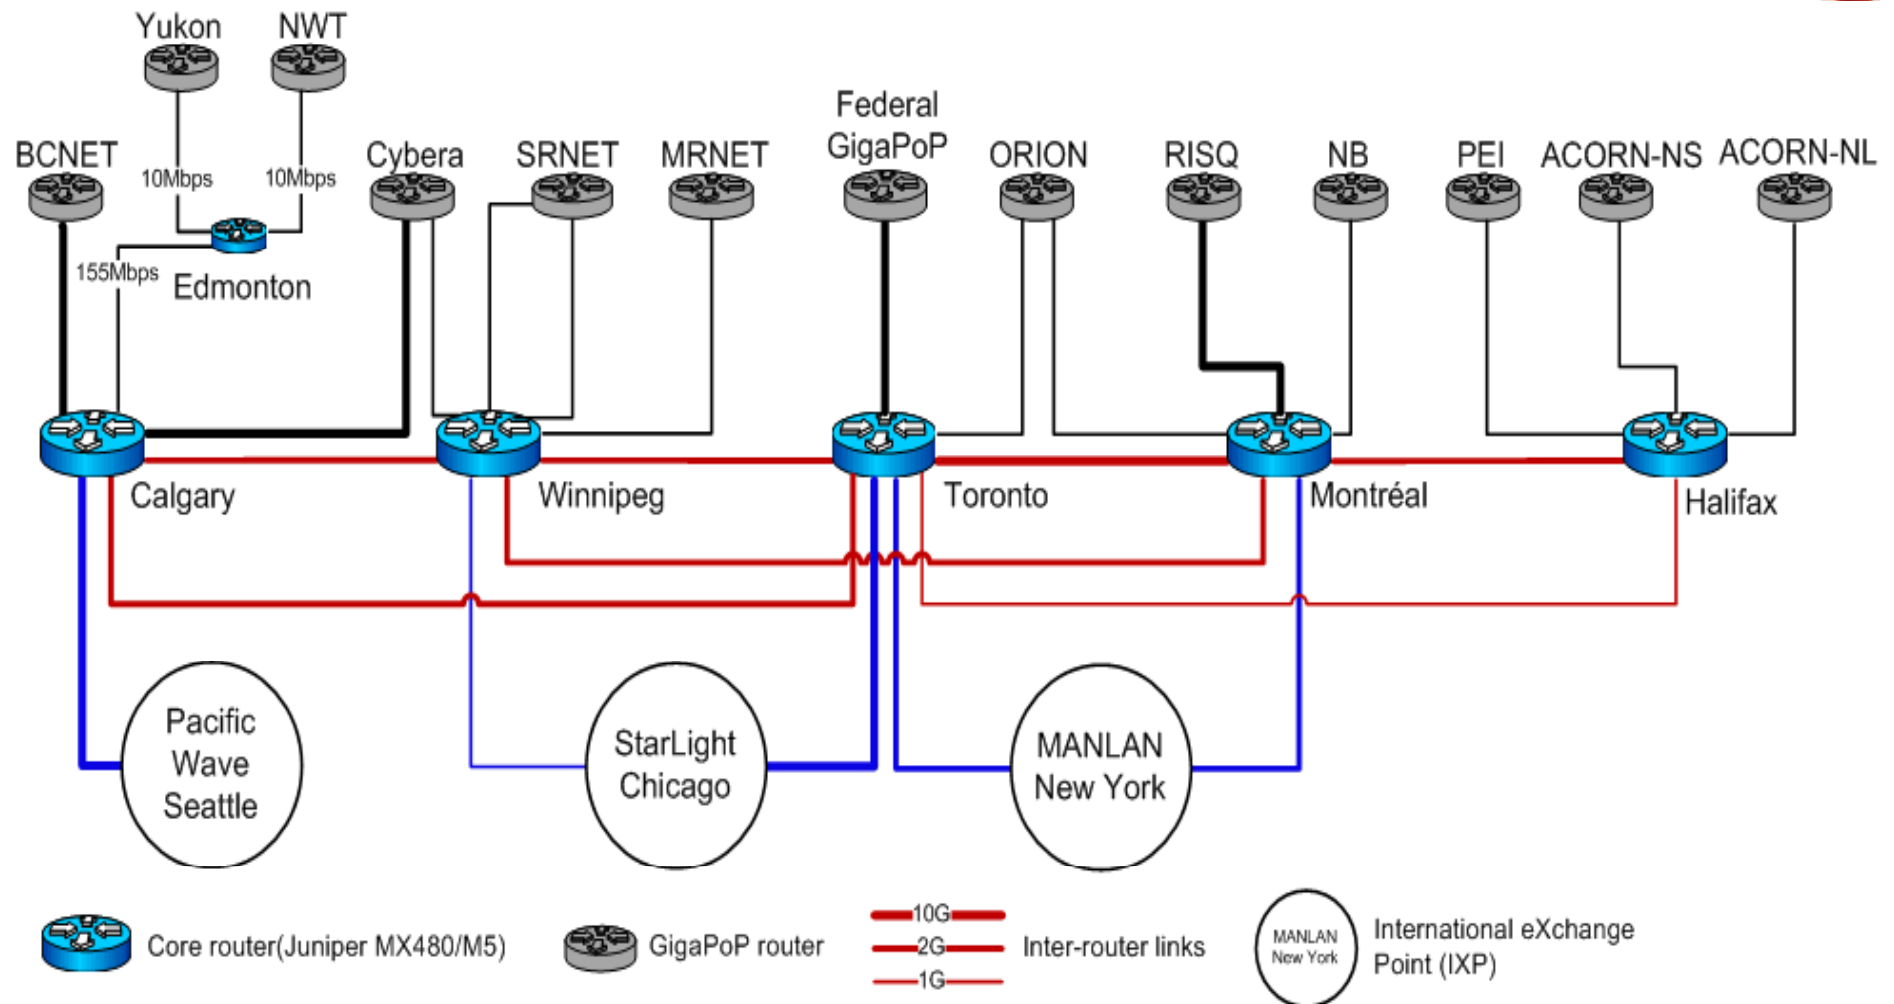

canarie

Canada's Advanced Research and Innovation Network  
Le réseau évolué de recherche et d'innovation du Canada

# IP Network Interconnections

canarie

**- North American First –  
100G Demonstration on the  
CANARIE Network**

# Ottawa to Chicago 100G

canarie

## Ottawa – Chicago

- CANARIE CPL / 6500 1300km

## Ciena 100G Adaptive Engine

- Volume deployable high capacity solutions
- Improved spectral efficiency with more bits per symbol
- Retain Superior Performance and Agility Characteristics of Existing 10G Systems
- Plug and Play solutions leverage existing infrastructure and investment

# Application – 100G

canarie

Ability to show simultaneous data-flows sourced from major collaborators.

- iCare
  - NCDM
  - NASA
  - CBrain / Gbrain
  - HSVO
- } Data Intensive
- } Visualisation Applications

MEN LAB 10 Tile Display

**OFFICIAL DEMONSTRATION

# New GOLE Equipment

# The Issue

- HDXc
- Manufacture discontinue effective date: June 2019.

## Problems:

1. Expansion
2. End of life
3. Horizon

**PHASED OUT**  
**Replaces by OME6500 32 slot**

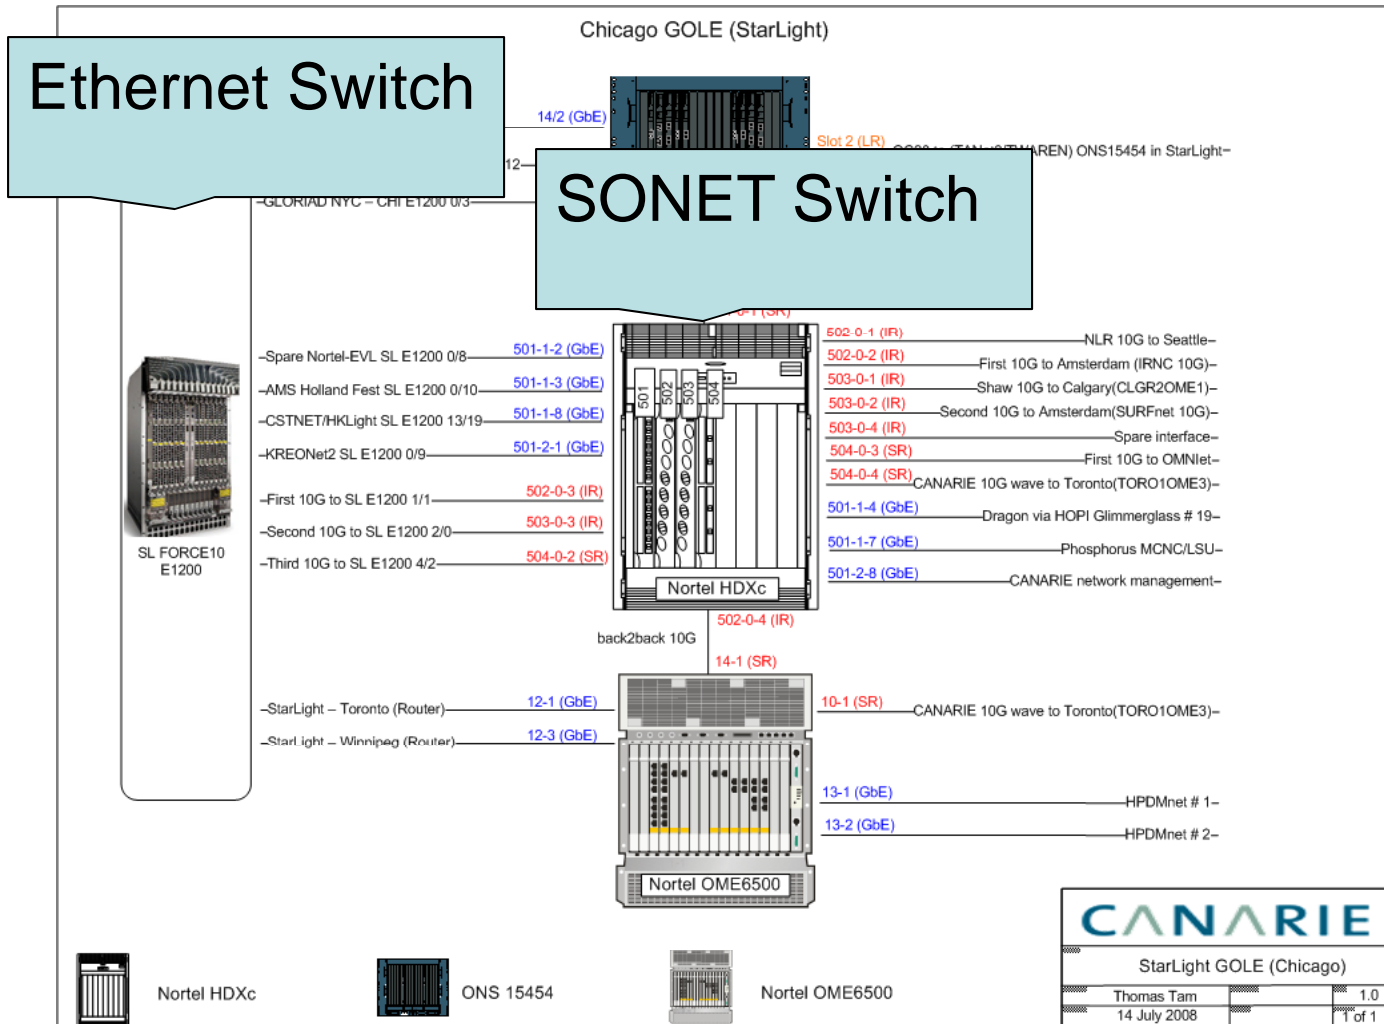

1. Architecture and feature definition
2. Finance for the GOLE refresh
3. Replacement timeline
4. Equipment and platform

## Opportunities:

1. Modern reference GOLE Architecture (L0-L2)

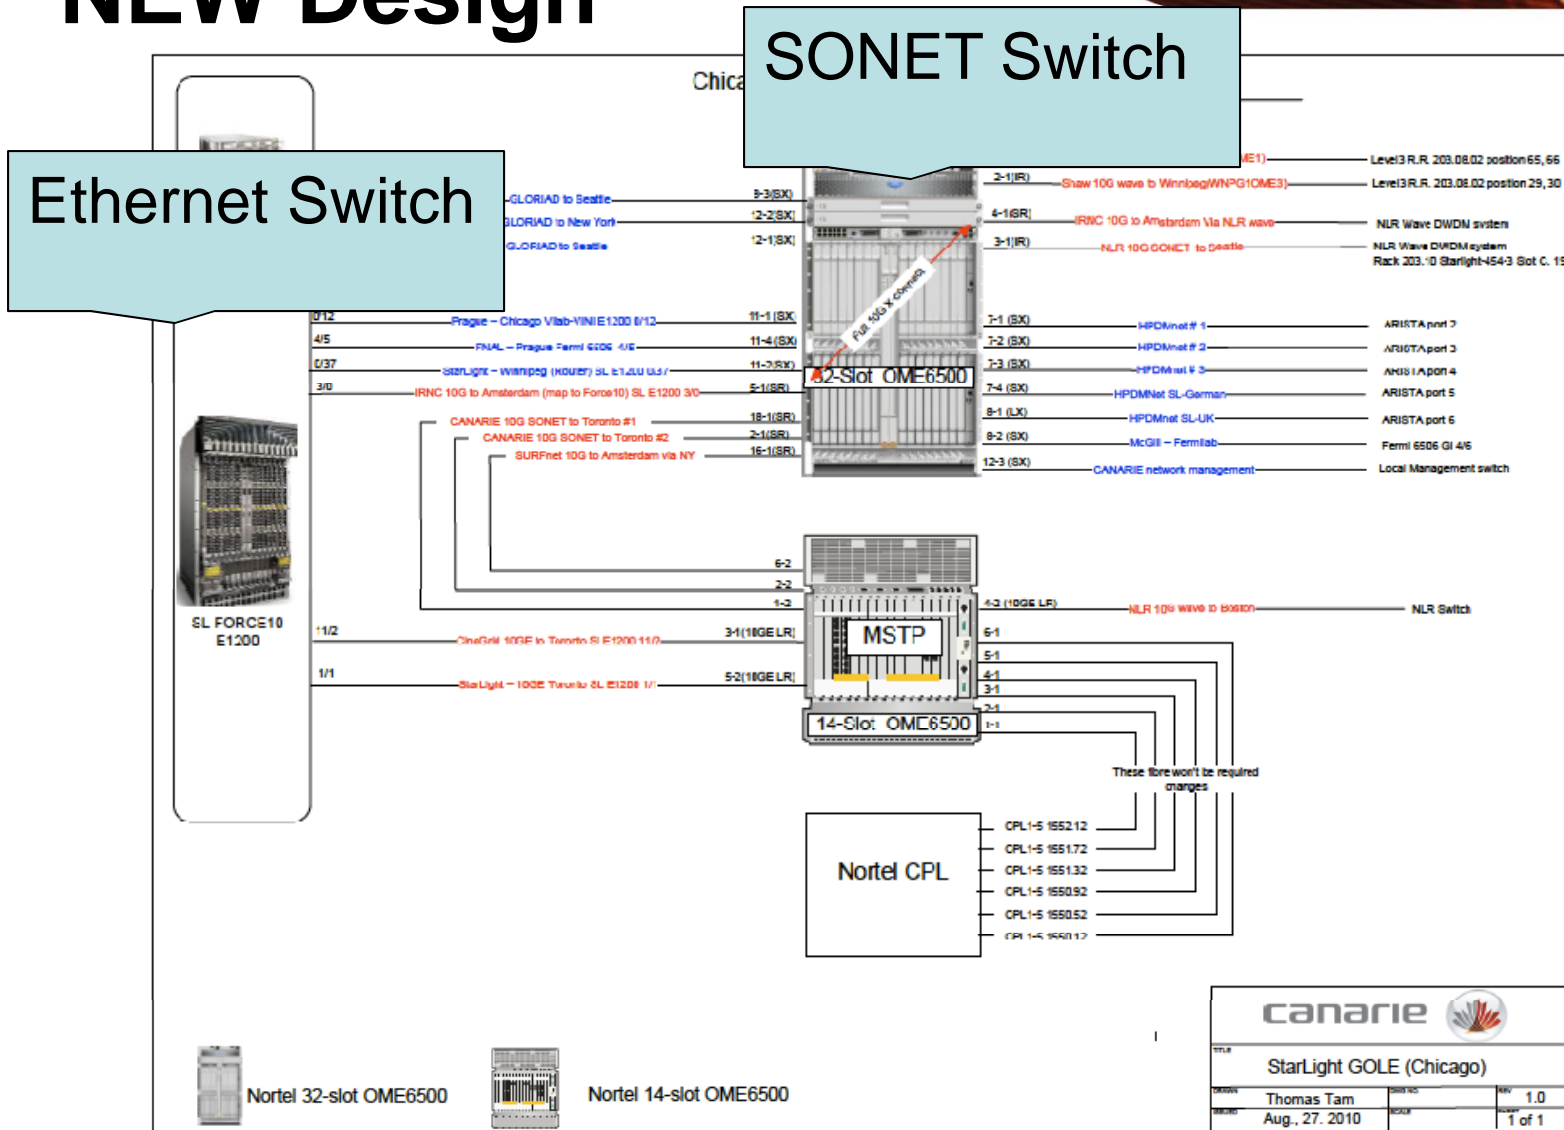

# Chicago GOLF OLD Design

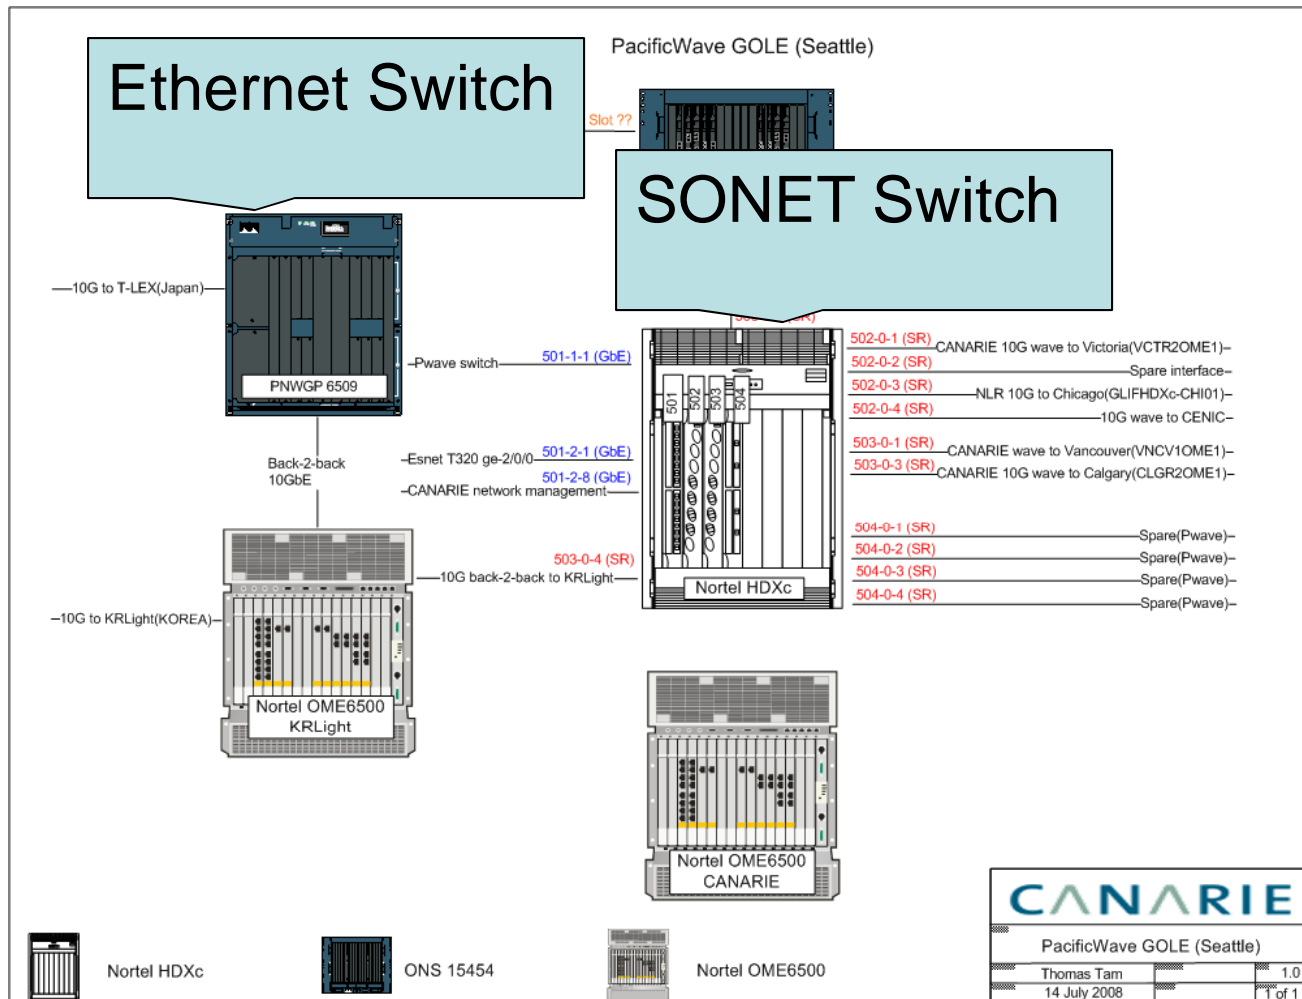

# Chicago GOLE NEW Design

canarie

# Seattle GOLE Design

canarie

# New Disruption

1. Network Transition to Carrier Ethernet
2. NEW IRNC award
3. Agreements to Global Network Design

**CANARIE Timeframe**  
**2013-2014**

BACKUP

# Objectives

The Next Generation GOLE Taskforce will develop the future requirements and reference architecture for GOLE.

WHY?

1. Creating a blueprint will facilitate equipment replacement at GOLE
2. The blueprint will help framing what are the functions that are fundamental for a GOLE and which are optional.

# Question to Answer

- What is the architecture of GOLES today?
- What works well in creating connections?
- What does not work well connecting?
- What are the functions of the FUTURE GOLE?
- What services are common to every GOLE?
- What service are relevant for future GOLE?
- Where do GOLE evolve in the future?
- Is there a way to simplify GOLE and operations?
- What are the impact of the change in emphasis from SONET centric to Ethernet centric?
