

StarLight GOLE Update

10th Annual Global LambdaGrid
Workshop

Joe Mambretti, Linda Winkler, Alan Verlo

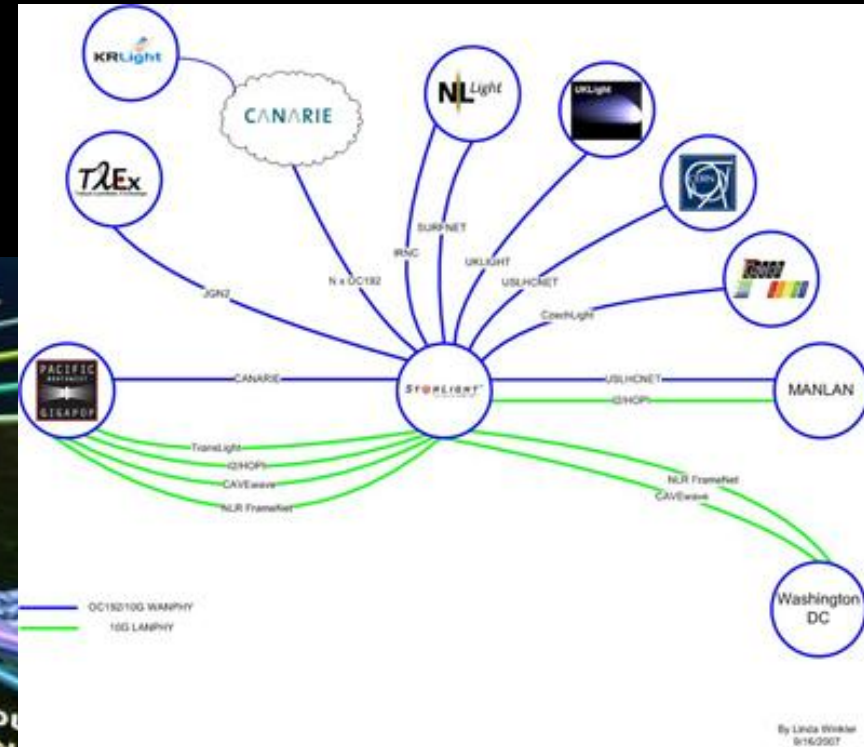

& the StarLight International Consortium

CERN, Switzerland

12-14 October 2010

Current StarLight Infrastructure

Ciena OME, Calient PXC (L1)
Force10 E1200 (L2/L3)
Many Lambdas & Collaborators

<http://wiki.glif.is/index.php/StarLight>

Measurement Servers:
bwctl, owamp, ndt/npad,
perfSONAR

IRNC:ProNet: TransLight/StarLight

July 13, 2010

Tom DeFanti, Maxine Brown, Joe Mambretti, Tajana Rosing

Calit2, University of California, San Diego

Electronic Visualization Lab, University of Illinois at Chicago

International Center for Advanced Internet Research, Northwestern University

20 years of NSF-Funded High-Performance
International Networking for
Advanced Applications
(1995-2014)

IRNC TL/SL 3-Year Deliverables

- Continue enabling multi-national application and middleware experiments on international networks
 - High-Performance Digital Media Network (HPDMnet)
 - iGENI: the GENI-funded international GENI project*
 - SAGE: connecting people and their data at high-res*
 - CineGrid: it's all about visual communications
 - GreenLight International: less watts/terabyte*
 - Science Cloud Communication Services Network (SCCSnet)*: the impending disruption
- Build cooperative partnerships (e.g. MSC-CIEC*)
- Serve GLIF, NLR, and I2 as senior leaders, reviewers
- New services, including many with industrial partners
- Create opportunities for all the REUs we can get*

*Currently also funded by various NSF awards to UCSD/UIC/NU

iGENI: International Global Environment for Network Innovations

Joe Mambretti, Director, (j-mambretti@northwestern.edu)

International Center for Advanced Internet Research (www.icair.org)

Northwestern University

Director, Metropolitan Research and Education Network (www.mren.org)

Partner, StarLight/STAR TAP, PI-OMNINet (www.icair.org/omninet)

Maxine Brown, Associate Director (maxine@uic.edu)

Electronic Visualization Laboratory (www.evl.uic.edu)

University of Illinois at Chicago

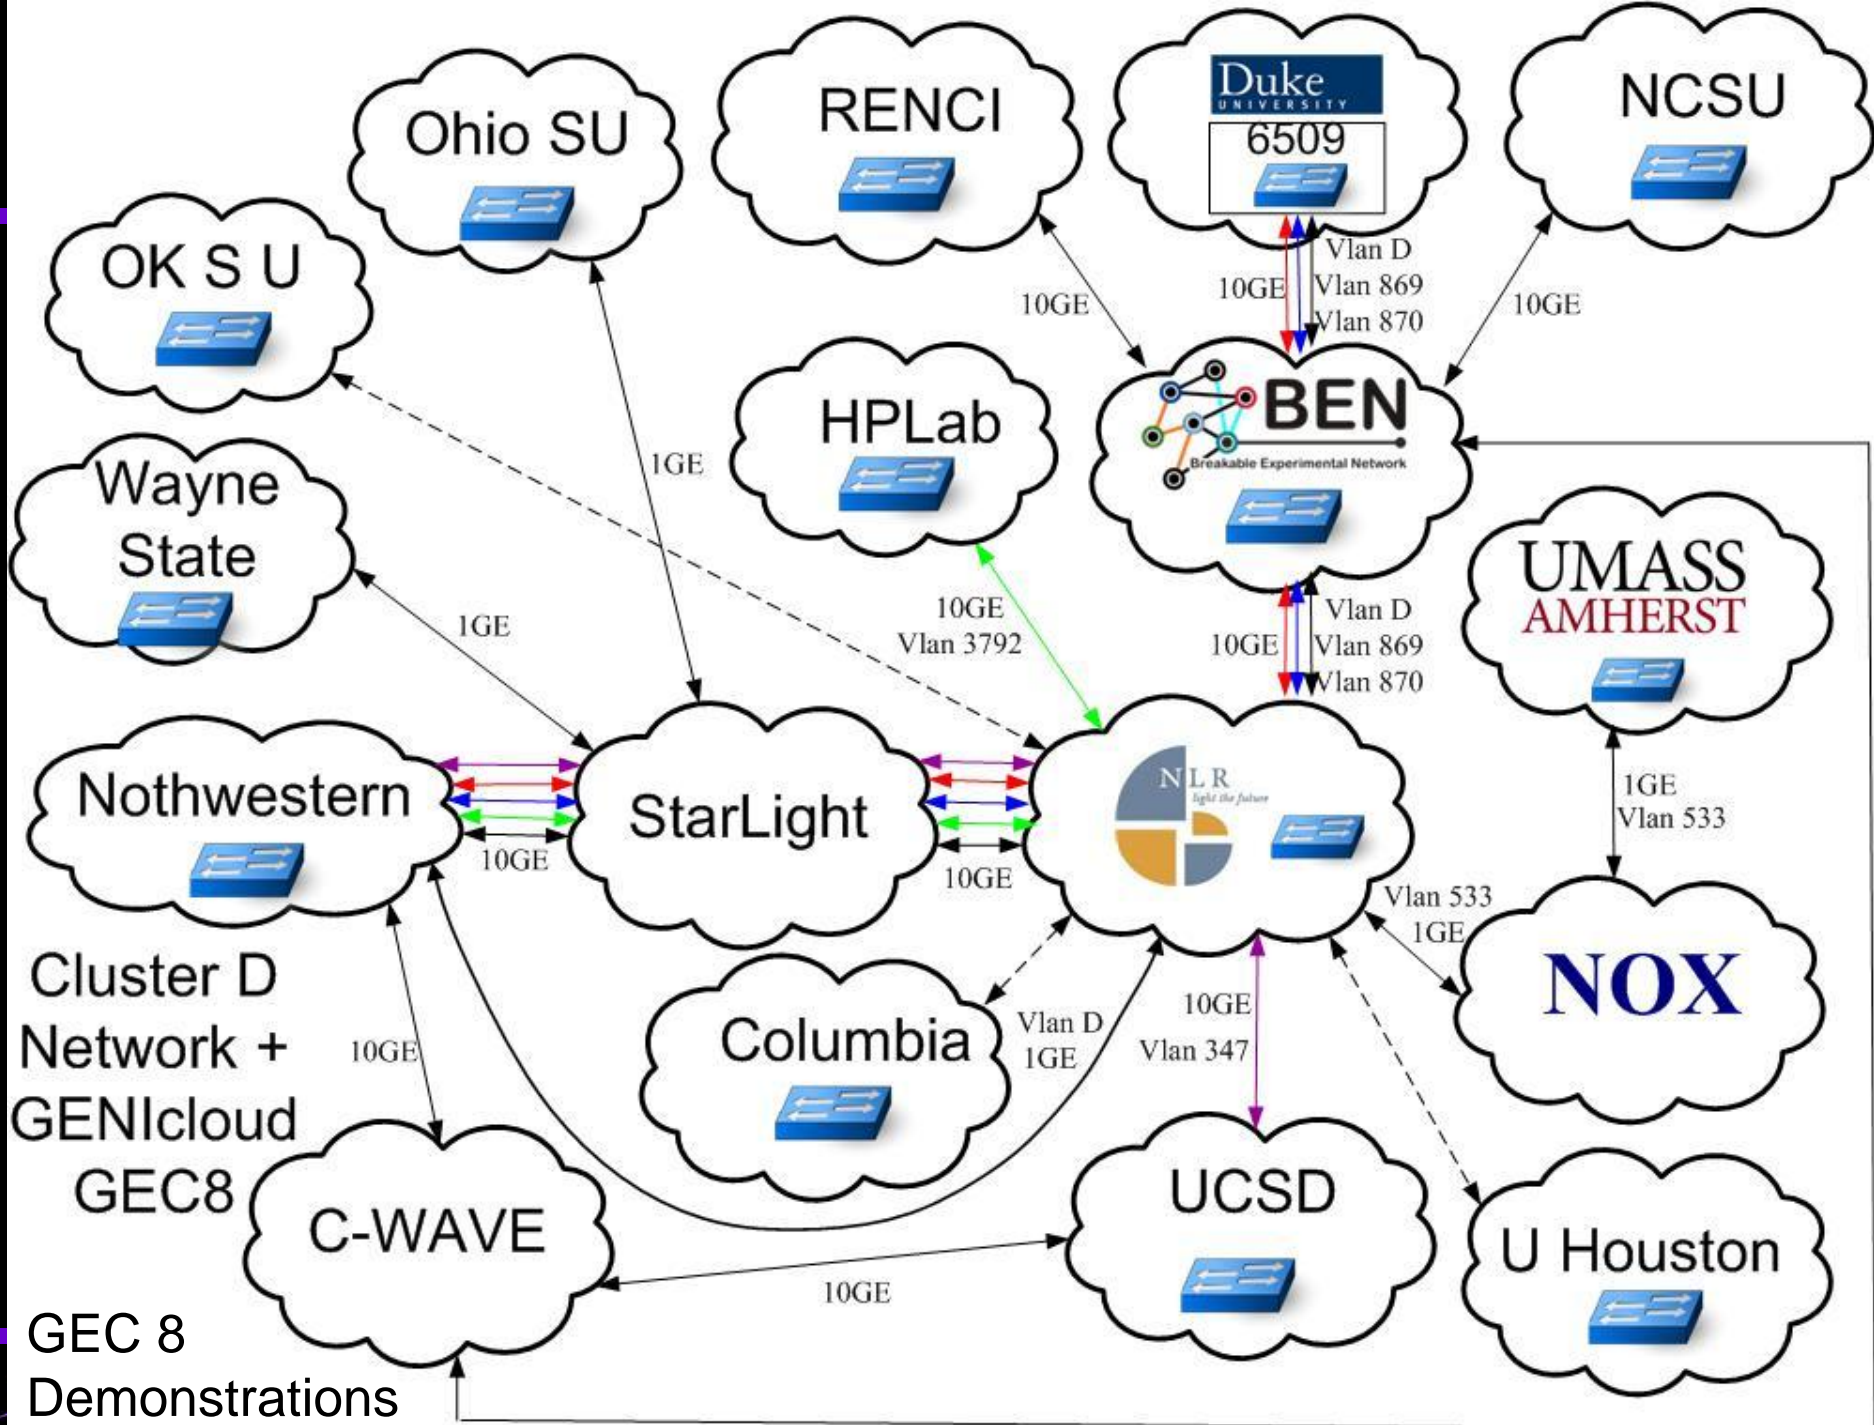

Tom DeFanti, Research Scientist (tdefanti@ucsd.edu)

California Institute for Telecommunications and Information Technology (www.calit2.net),

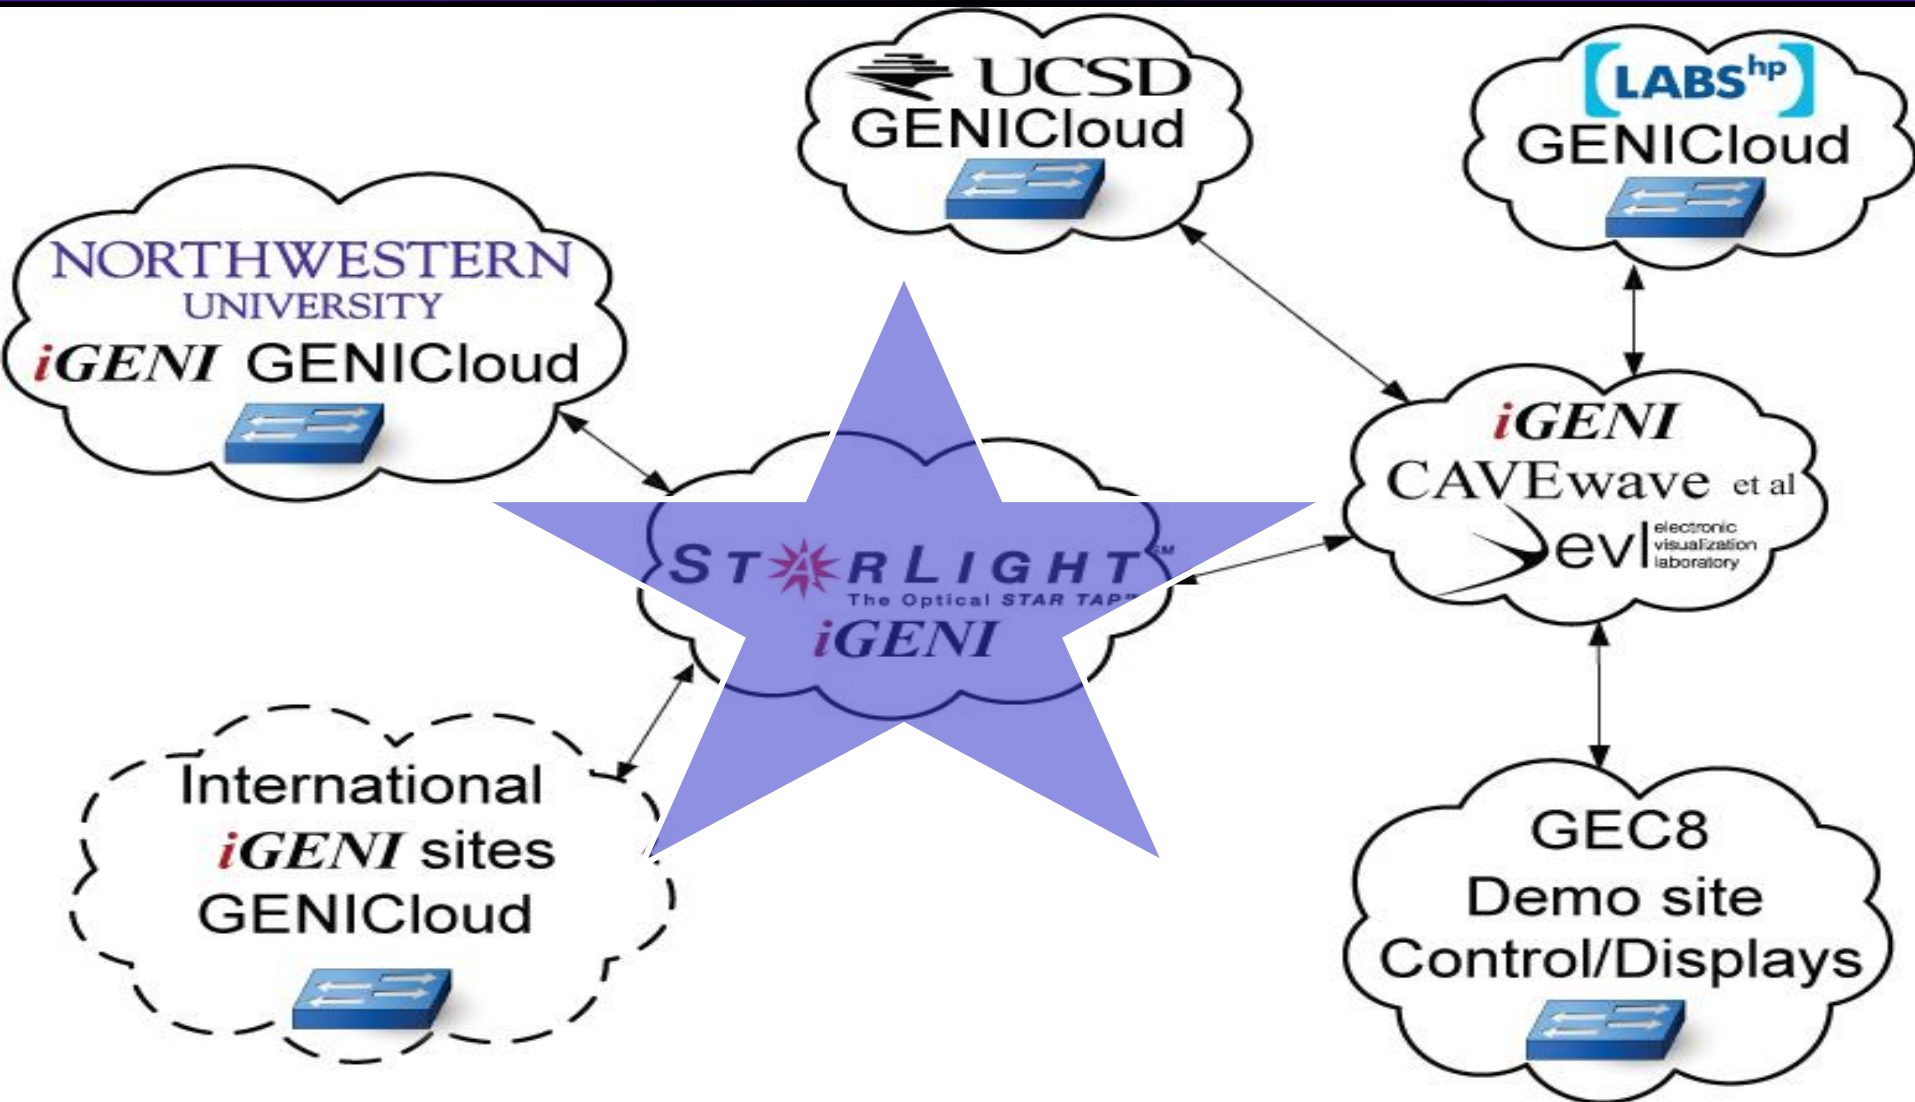

University of California, San Diego

iGENI: The International GENI

- The iGENI Initiative Is Designing, Developing, Implementing, and Operating a Major New National and International Distributed Infrastructure.
- iGENI Is Placing the “G” in GENI Making GENI Truly Global.
- iGENI Is Creating a Unique Distributed Infrastructure To Support GLOBAL Research and Development for Next-Generation Network Communication Services and Technologies.
- This Infrastructure Is Being Integrated With Current and Planned GENI Resources.
- iGENI Infrastructure Is Interconnecting Its Resources With Current GENI National Backbone Transport Resources, With Current and Planned GENI Regional Transport Resources, and With International Research Networks and Projects
- iGENI Is Highly Leveraging Existing International Advanced Networking Facilities

iGENI Demonstration Next Week at GENI

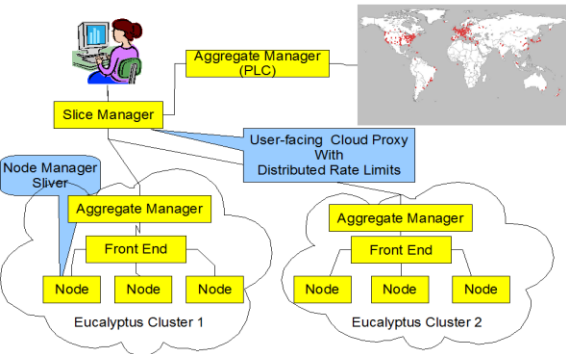

GENICloud

Andy Bavier, Jessica Blaine, Daniel Catrein, Jim Chen, Yvonne Coady, James Kempf, Christian Lottermann, Joe Mambretti, Rick McGeer, Alex Snoeren, Johannes Willig, Marco Yuen, Alvin AuYoung

GENICloud Architecture

Status and Accomplishments

- Integrated Eucalyptus and GENI
 - Eucalyptus release supporting the SFA
- Unified API interface to Eucalyptus and SFA
 - GENI tools now work on (our) Clouds
- RSpec for Eucalyptus
- Resource Discovery
 - Kernel/Disk images
 - Instance Types
- Jobs instantiated on multiple Clouds
- Distributed Rate Limiting over multiple Clouds

Roadmap

- Full integration of PlanetLab and Eucalyptus
- Complete "Slice Manager" – user-facing multiple-SFA facility controller
- Integrate DRL into cross-facility slices
- New GUI for PlanetLab, Eucalyptus, cross-SFA Facilities

GENICloud Demo

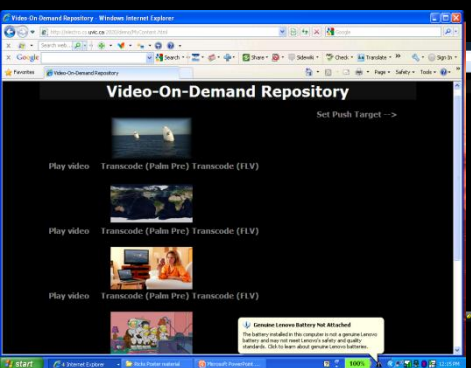

- Transcoding on Eucalyptus Clouds at UCSD, HP Labs, iCAIR (Northwestern)
- Transcoding app thanks to Ericsson Research
- For GEC-9:
 - Integration with NLR (CAVEWave)
 - Integrated Distributed Rate Limiting

Transcoding videos at three clouds:

- HP OpenCirrus
- Northwestern Univ. OpenCloud
- UCSD

Demo: Transcoding in the Cloud

VirtuLab Tile Display: Directly Connected To National 10 Gbps Testbed With Core at the StarLight Facility

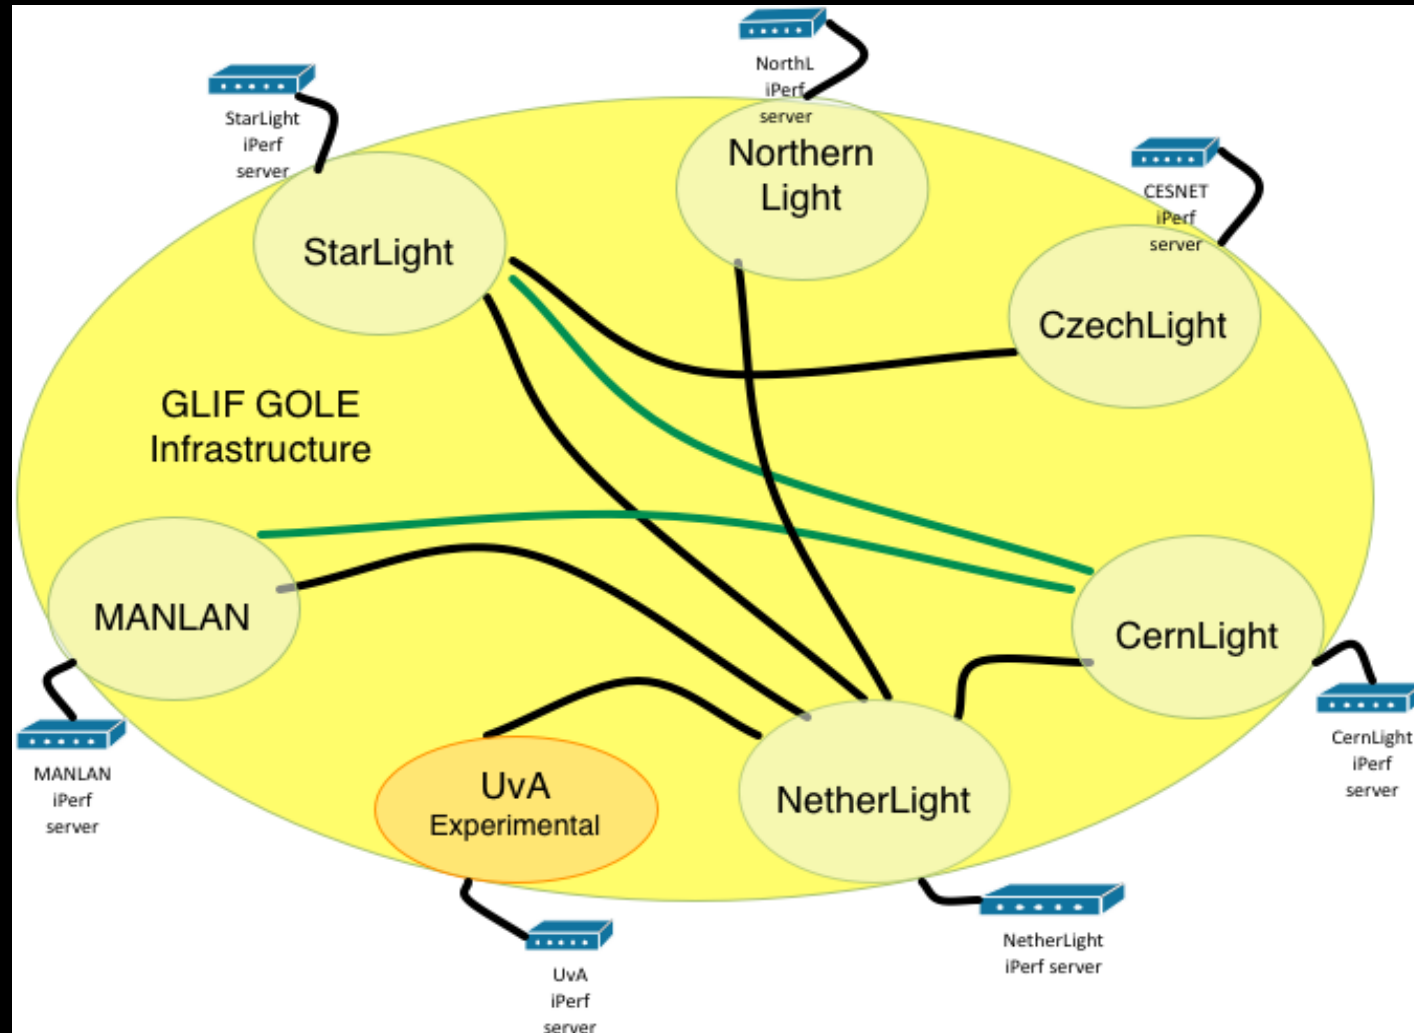

Multiple Network Research Testbeds

- Multiple Large Scale Network Research Testbeds
 - International
 - National
 - Regional
 - State-Wide
 - Metro
 - Local

Layer 2 Topology

Fenius/Automated GOLE Demonstration

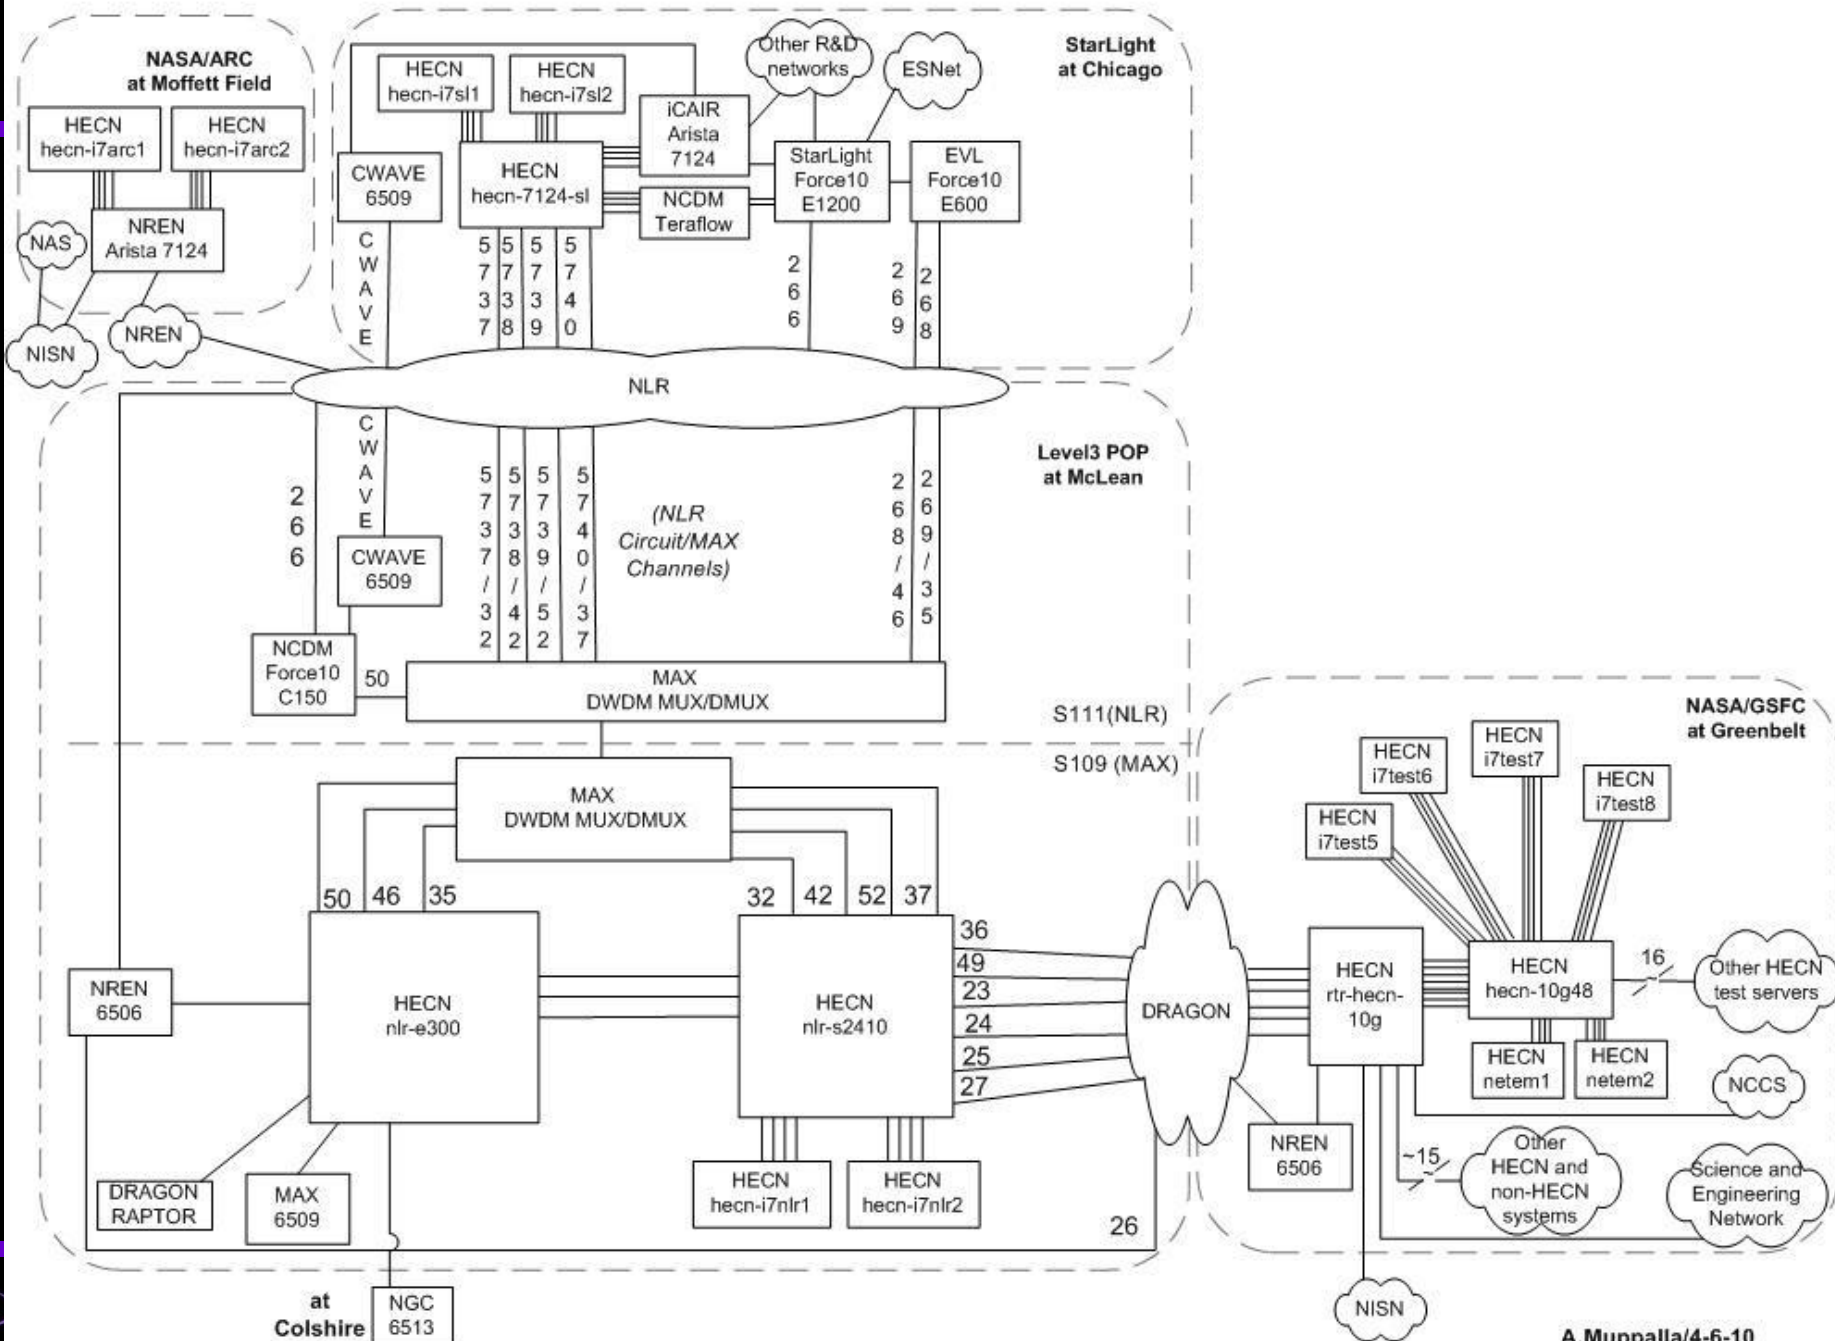

StarLight 100 Gbps/Tbps Initiatives

- StarLight Has Established Several Initiatives That Are Directed At Creating Networking Services, Architecture, Technology, and Networks Based on 100 Gbps and Higher Service, Including Tbps
- Foundation Research Is Based On Earlier Experience With Dynamic Lightpath Technologies
- 100 Gbps = More Than Capacity (e.g., Dynamic Control Over Channel Segments, Customization)
- StarWave: New NSF Award To Create a New 100 Gbps Exchange at the StarLight Facility for Data Intensive Science

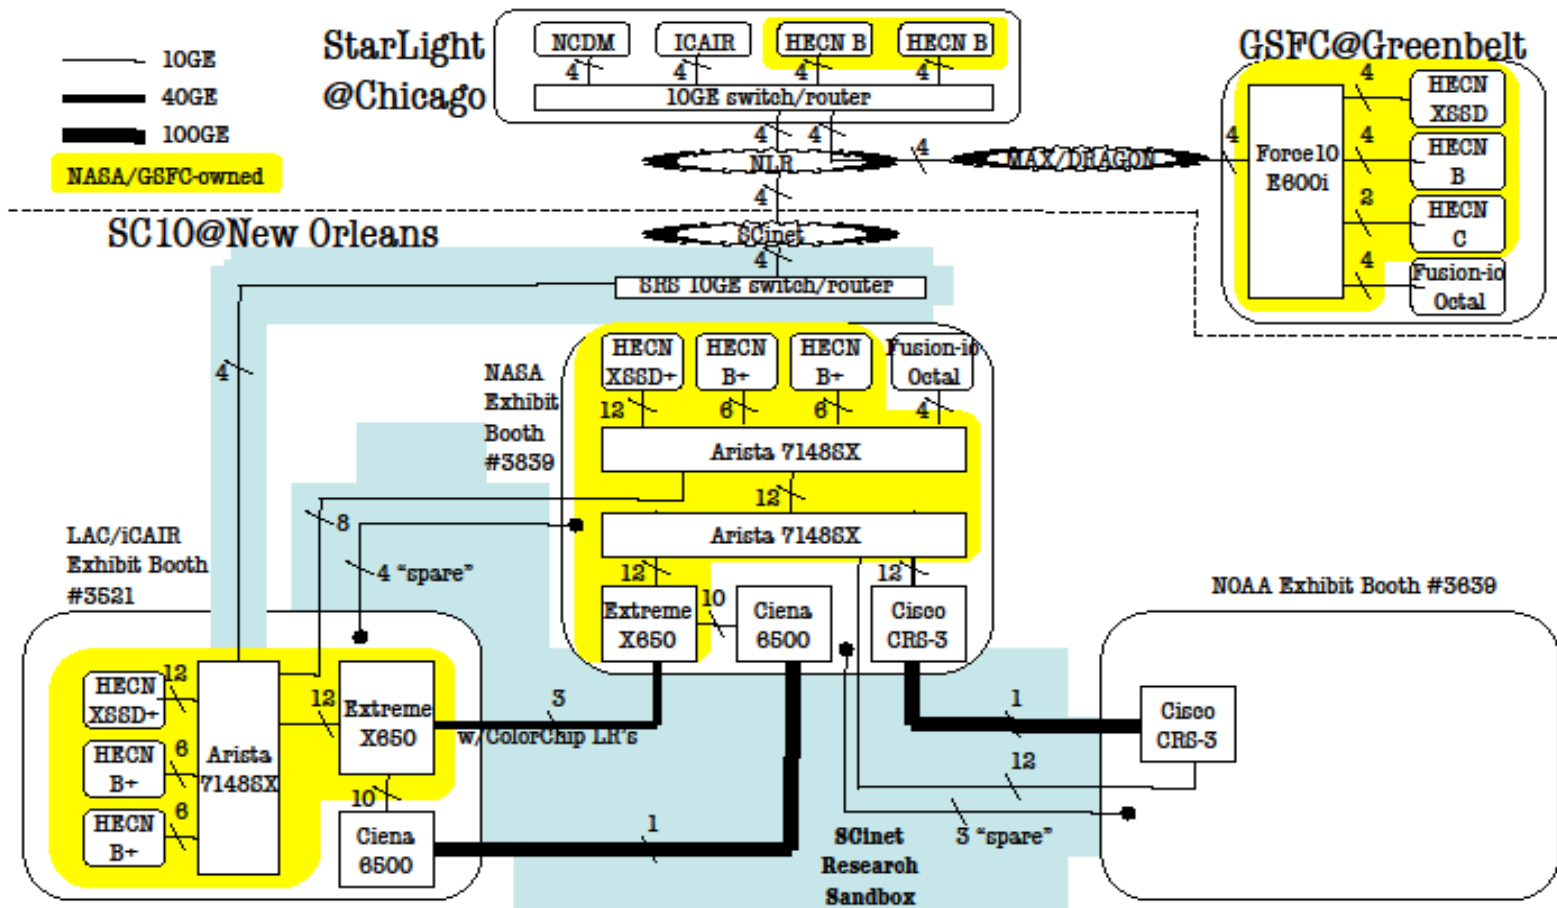

GSFC/High End Computer Network (HECN) and Partners 10GE and 10G Lambda Connections through McLean

Note: The non-GSFC/HECN systems shown typically have other connections that are not shown in this diagram, as the focus is primarily GSFC/HECN connections

Using 100G Network Technology in Support of Petascale Science

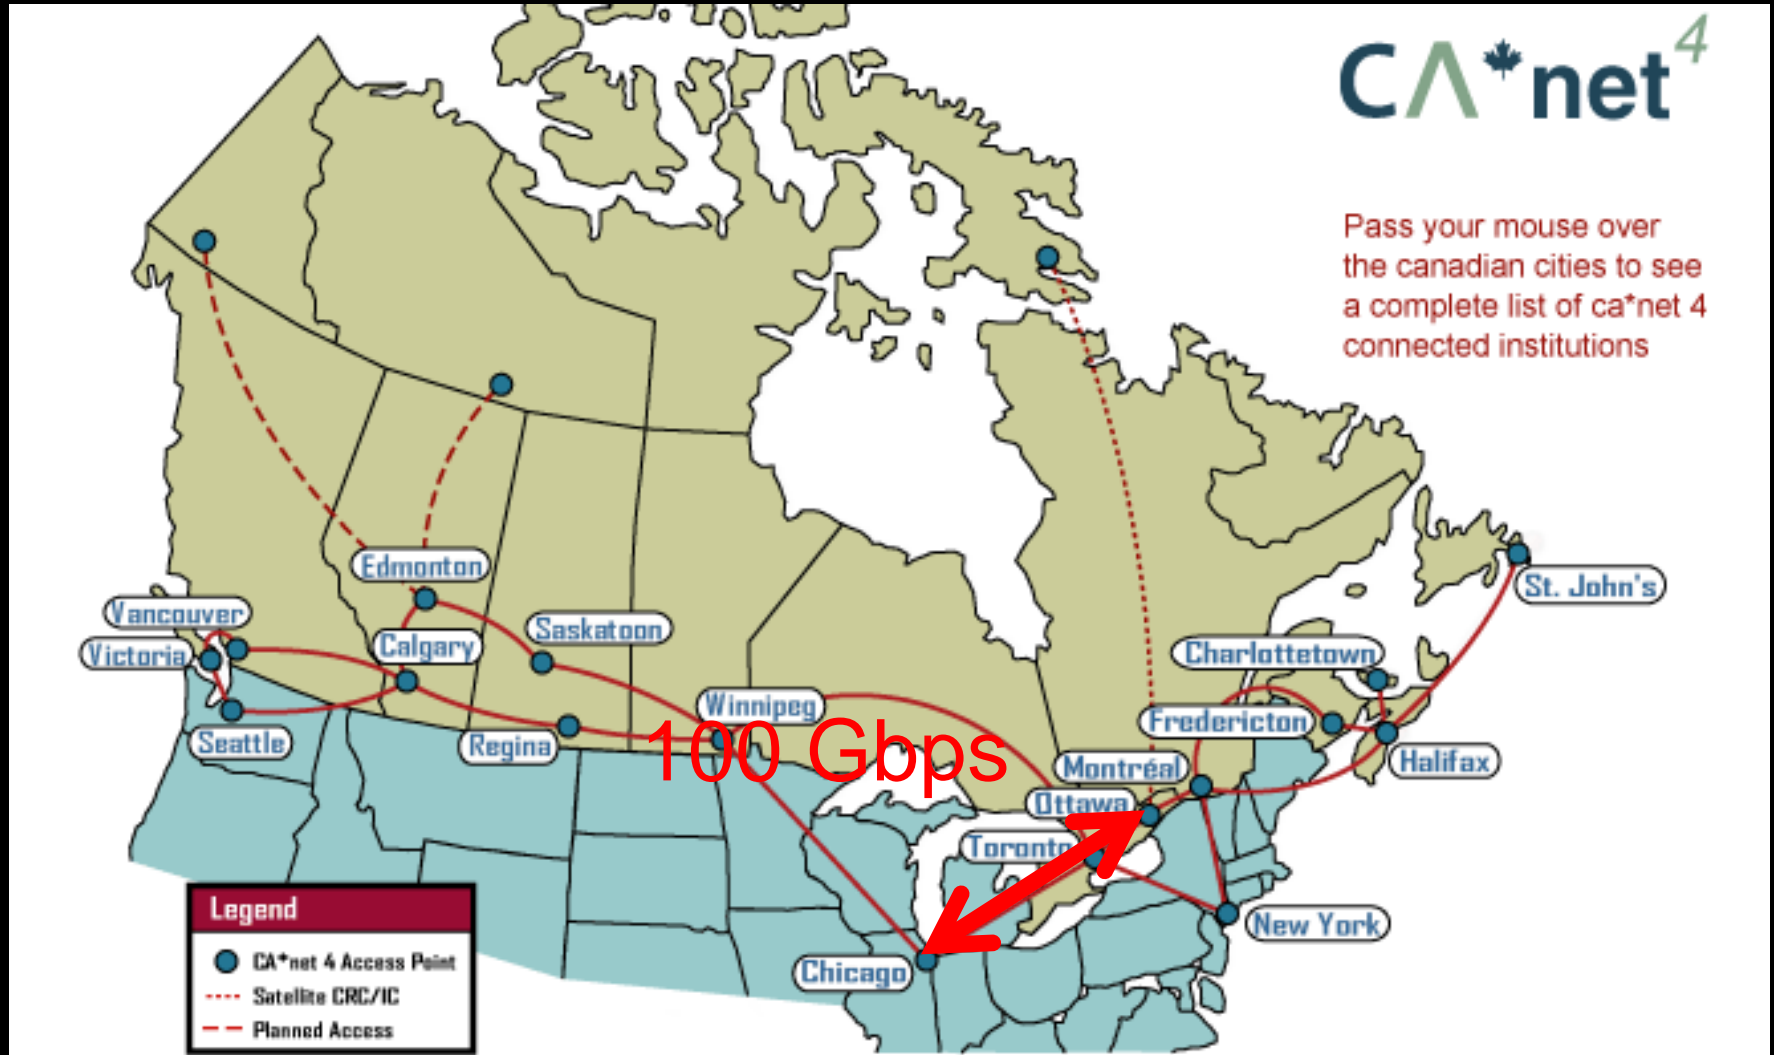

A Collaborative Initiative Among NASA, NLR, NOAA, Northwestern/iCAIR, SCinet & UIC/LAC

09/14/10

J. P. Gary

CA*net/Ciena/StarLight/iCAIR 100 Gbps Testbed Implemented In Sept 2010
