This is the Future of Virtual Reality

3D VR Collaboration

- **Virtual Reality adds stereo vision and tracking so that the user sees the correct perspective in real-time**
 - **First improvement in image rendering since the European Renaissance**
- **Networking allows models to be delivered and explored and linked over distance**
- **It has been very expensive, but is now getting cheaper**
 - **Video game cards in PCs now used instead of \$1M computers**
 - **Conference room HDTV projectors and LCD panels instead of \$100,000 movie theater video projectors**
 - **It's ready for general deployment!**

Bezels and Panels

- **Thick bezels are annoying**
 - They interrupt the image
 - They create edge violations in 3D
 - For now, we work with them
- **3D Ultra-narrow bezel displays now available in 720p micro-polarization (xpol), but are expensive**
 - UIC/EVL leading the research and development
- **Ultra-narrow bezel displays are not available in:**
 - Active Stereo
 - Autostereo1080p
- **LG OLED 55" UNB 9-kilogram screen with xpol coming September?**

Tiled Micropolarized (Xpol) 3D Panels (w/Glasses)

Image for **left eye** (1080i/60 interlace scan)

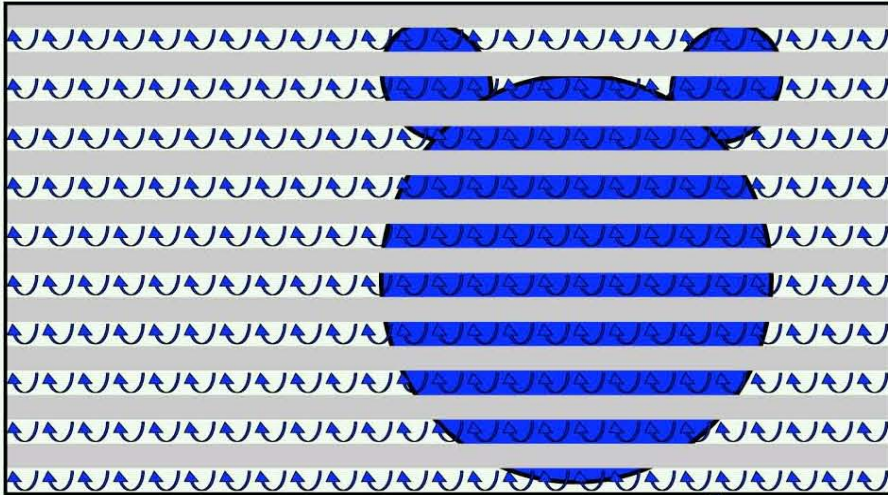

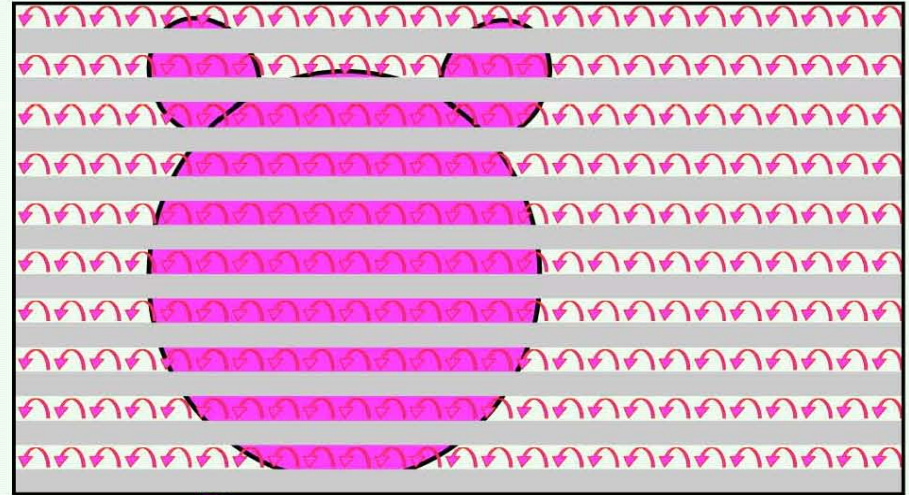

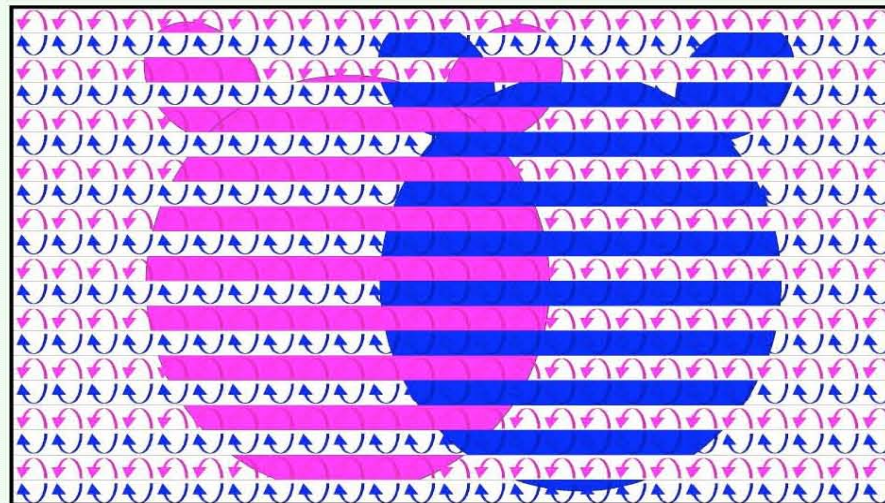

Image for **right eye** (1080i/60 interlace scan)

Combined Image (1080p/60 progressive scan)

Polarizing Glasses filter the light so the viewer can perceive a correct 3D image

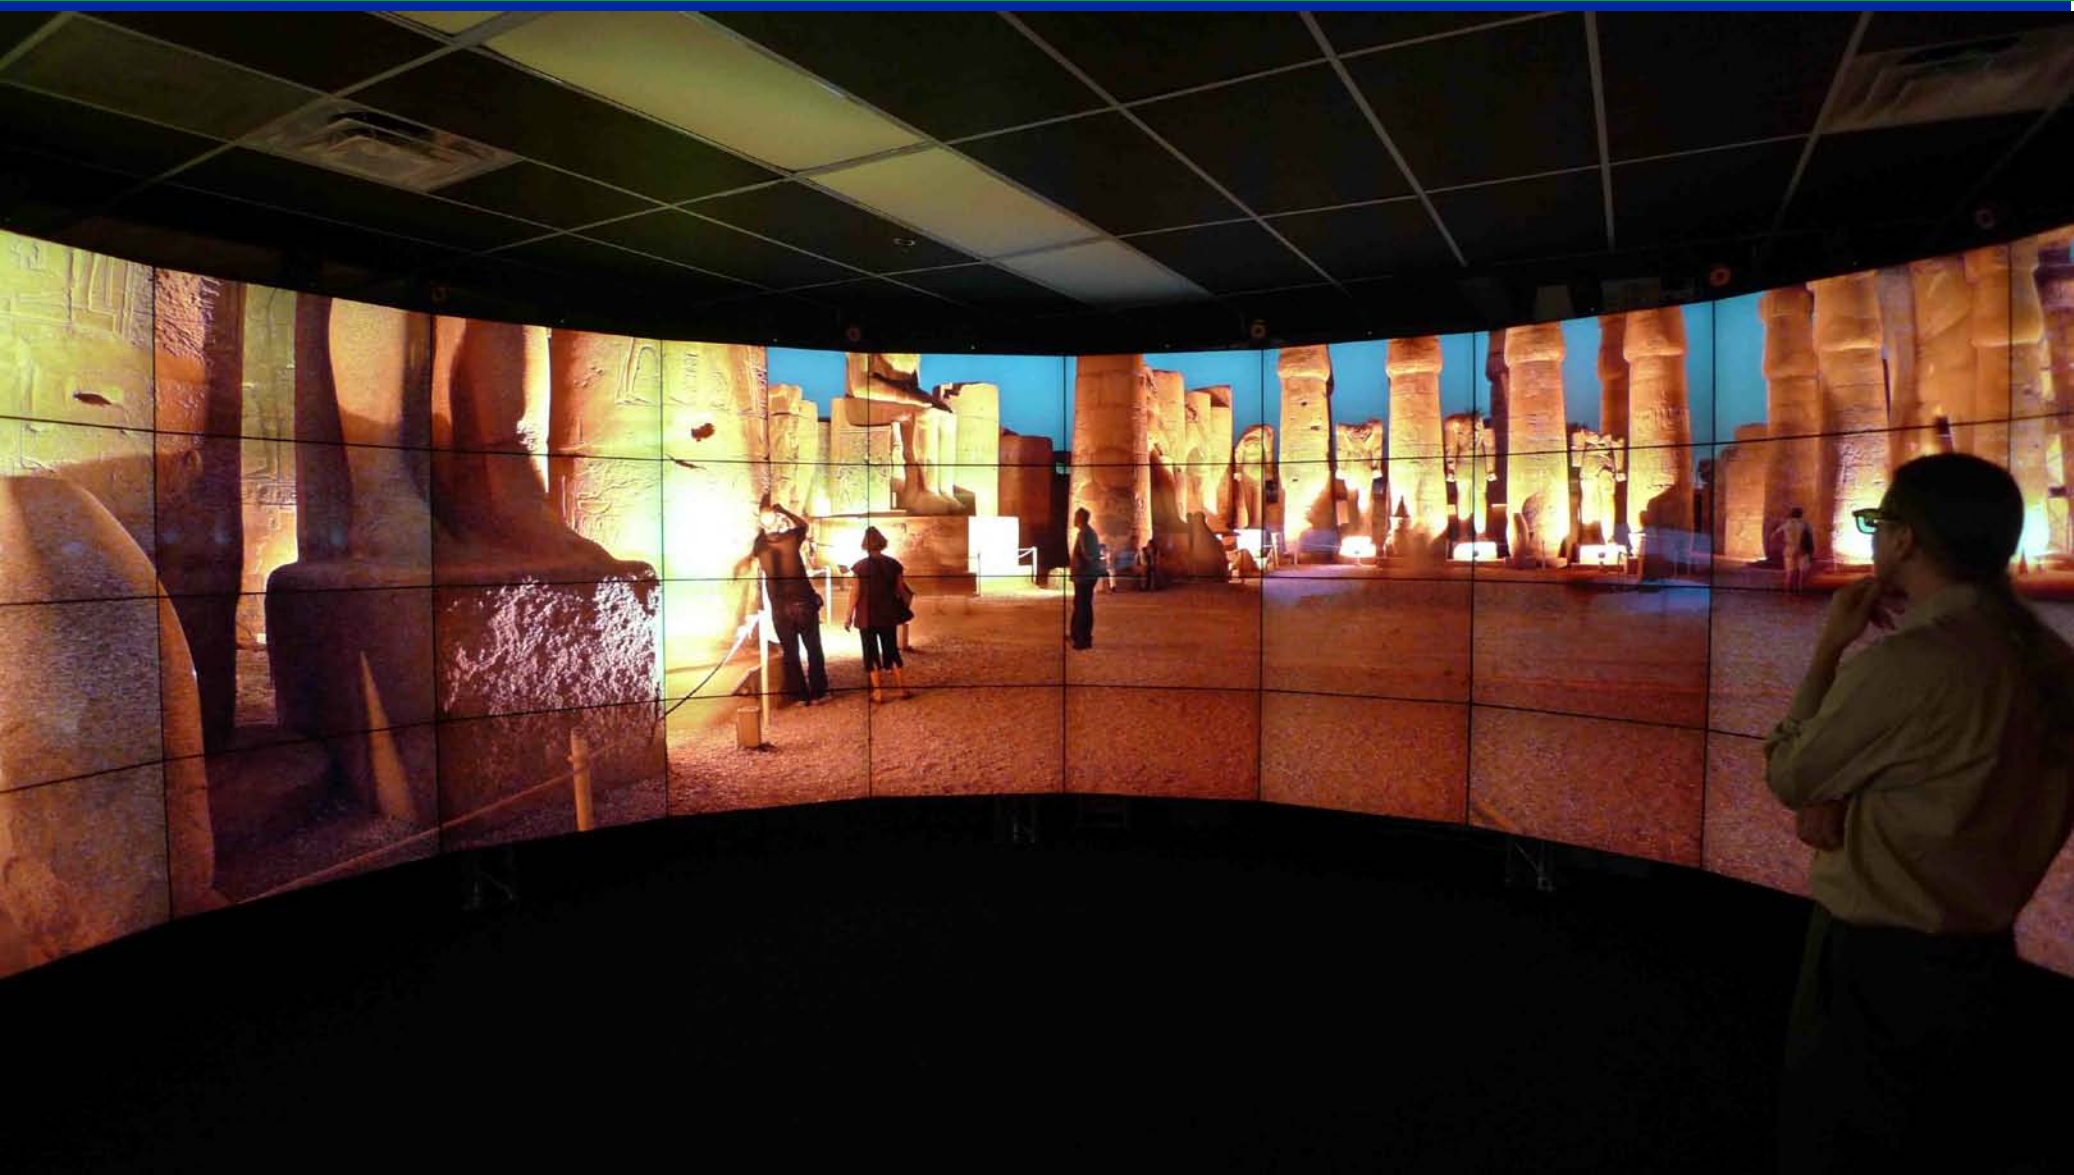

The **Xpol™** is attached on the surface of the LCD HDTV Display alternately

Thank You Very Much!

- **Our planning, research, and education efforts are made possible, in major part, by funding from:**
 - US National Science Foundation (NSF) awards ANI-0225642, EIA-0115809, SCI-0441094, and CNS 0821155
 - State of California, Calit2 UCSD Division
 - State of Illinois I-WIRE Program, and major UIC cost sharing
 - King Abdullah University of Science and Technology (KAUST)
 - King Abdulaziz City for Science and Technology (KACST)
- **University of Illinois at Chicago, Argonne National Laboratory, and Northwestern University for StarLight networking and management**
- **National Lambda Rail, Pacific Wave and CENIC**
- **NTT Network Innovations Lab**
- **Cisco Systems, Inc.**
- **Pacific Interface, Inc.**
- **Canon, Inc.**
- **Sharp Labs of America**
