# GLIF network vision

- Optical networks
- GOLE-by-GOLE circuit routing
- Global networking for global science

- Volunteers realizing the vision
- Defined Open Exchanges, Lambdas, and other GLIF resources
- Worked on
  - Control planes
  - Network Descriptions
  - Dynamic Provisioning
  - AutoGOLE
  - NSI

## [GLIF mini-glossary](#)

**GLIF network resources:** GOLEs and lambdas

**GOLE:** GLIF open lightpath exchange, comprised of one or more network devices performing lightpath switching.

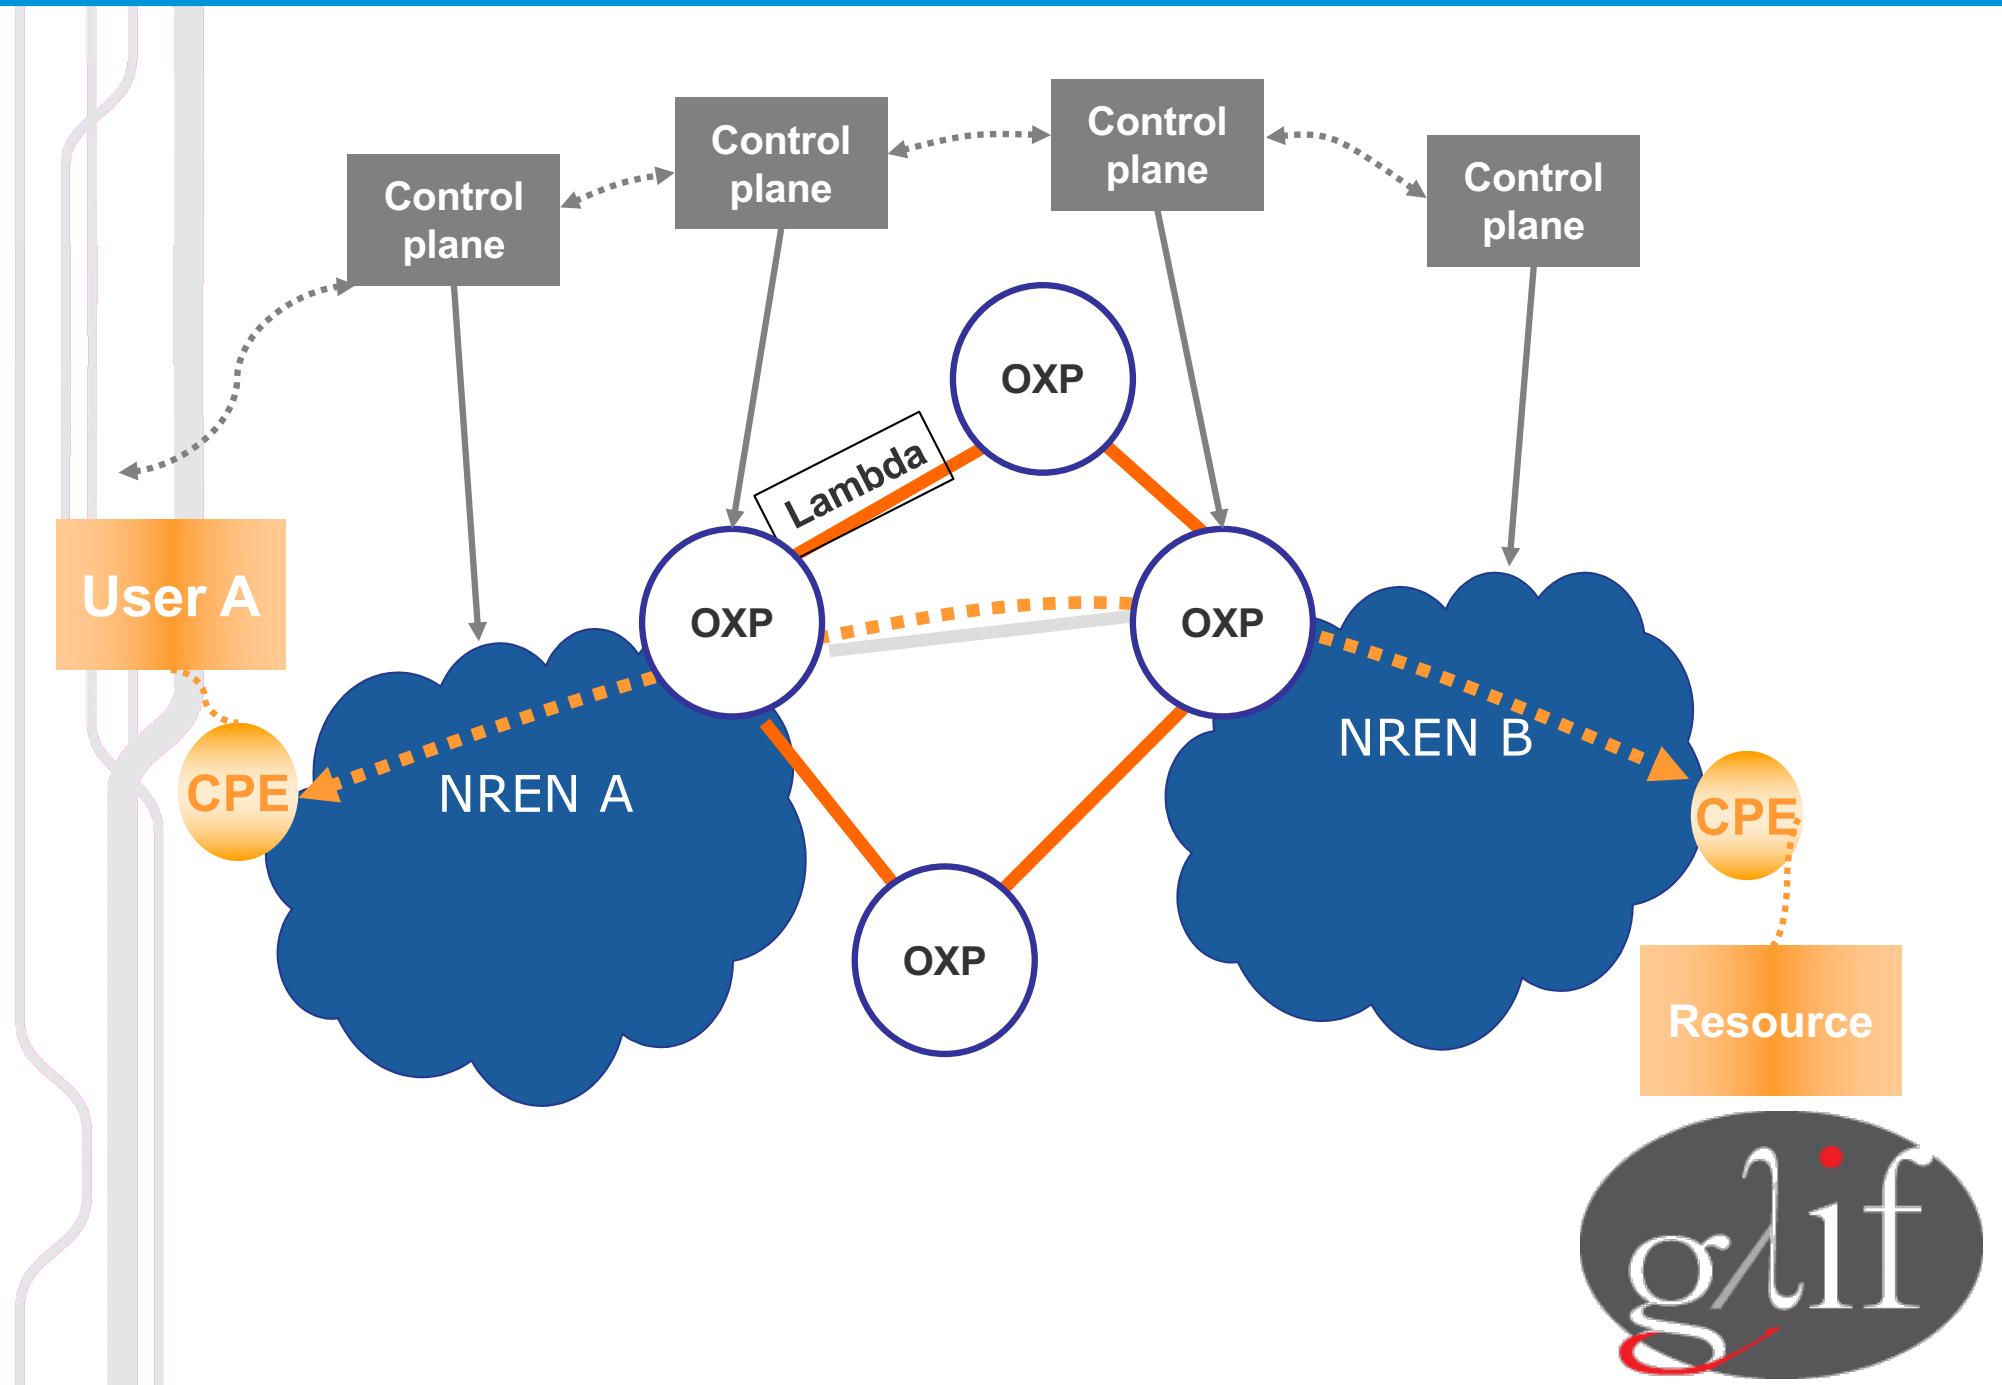

**lambda:** a high-capacity optical circuit which terminates on a GOLE

**lightpath [service]:** a high capacity circuit or QoS-supported virtual circuit [service], or the concatenation of several of these to form an end-end lightpath. A lightpath can take up a portion or all of the capacity of a lambda.
